DarkFlash DS900WD computer case (white)

Darkflash DS900WD is an enclosure designed for users who want practical solutions. The tempered glass side panel and wooden front panel provide good visibility of components and give the whole case a distinct look. It allows the installation of motherboards in ATX, M-ATX and ITX formats, giving you great flexibility when building your computer. With its spacious design and multiple mounting options, it provides convenient kit assembly and good air circulation.

Various cooling options

The DS900WD offers space to install 12 120 mm fans or 2 140 mm fans and water cooling at the top 360 mm or 240 mm, and at the front 240 mm. This allows you to build an effective cooling system for powerful configurations. In addition, the rear panel of the case features a large steel ventilation

mesh for effective heat dissipation.

Thoughtful layout and ample space

The chassis will accommodate a graphics card up to 425 mm in length and CPU cooling up to 170 mm in height. There are 7 PCI-E slots, allowing the kit to be expanded with additional expansion cards. For storage media, space is provided for two HDDs or one SSD and one HDD, so you won't run out of space for games and files.

Built-in ports

The Darkflash DS900WD chassis is equipped with a set of the most commonly used ports that make everyday use of the computer easier. On the top panel you'll find one USB 3.0 (Universal Serial Bus 3.0, a high-speed data transfer connector), while 2 additional USB 2.0 ports are ideal for connecting a mouse, keyboard, headphones or other accessories. There is also an HD Audio connector for convenient connection of headphones and microphone.

Refined details

On the right side of the case is a metal mesh, which not only provides adequate ventilation, but also blocks larger dust particles from entering the case. What's more, the top and bottom mesh panels also protect your equipment from debris, and their magnetic design makes them easy to install and remove.

Durable construction and stylish design

The body of the case is made of 0.5 mm SPCC steel, which ensures high durability. The whole unit measures 470 x 218 x 454 mm and fits into standard under-desk spaces. The stylish design and the ability to illuminate the fans make the set look modern.
