PXN WDS R2 gaming steering wheel

The PXN WDS R2 is a modular racing wheel designed for professional simulators and gamers who want maximum control. It is compatible with PXN VD4, VD6 and VD10 bases. It features a 300mm diameter rim, trimmed with high-quality microfiber. Personalization features are also available. With 13 programmable buttons, a 20-degree rotary encoder and RGB backlighting, the device can be customized to suit any track and riding style.

Faster and more reliable gear shifts

The precision Hall-Effect paddle system offers two modes of operation - the upper magnetic paddles provide clear and quick gear shifts, while the lower paddles guarantee smooth, linear movement for precise control.

Instant assembly and disassembly

The Quick Release system allows you to mount and dismount the handlebars without tools, allowing you to change the configuration in seconds. The sturdy mounting ensures stability and security even under heavy loads.

Comfort for long races

The rim of the steering wheel is upholstered with premium microfiber, which guarantees a firm grip, abrasion resistance and comfort during long races. Red stitching and a sporty design emphasize its racing character.

Personalization without limits

The steering wheel offers 11 customizable RGB LEDs that can act as an engine rev indicator or light effect for greater immersion. A 20-position push-button encoder allows quick adjustment of brake balance, ABS, or traction control. On top of that, there are 13 programmable buttons that, in conjunction with PXN SimRacing software, can be freely assigned - from camera control to pit strategy.

Compatibility with the best games

The PXN WDS R2 works with Windows 7-11 PCs and is compatible with the most popular racing titles, including, Assetto Corsa, Forza Horizon 5, DiRT Rally 2.0, F1 Series, EA WRC, Project CARS 2, Euro Truck Simulator 2, American Truck Simulator, Le Mans Ultimate and many more. This gives you maximum freedom of choice and a realistic experience no matter what you play.
