Model: W5600000

Manufacturer: SWITCHBOT

EAN: 810150546095

Product Code: 806934

R3,420

SwitchBot Lock Ultra smart door lock (black)

The SwitchBot Lock Ultra will open doors in just 0.3 seconds with a recognition accuracy of 98%. With Bluetooth 5.2 technology and Fast Mode, the lock responds as soon as the user approaches, speeding up daily entrances and exits. The silent motor upgraded with 100% faster operation, without disturbing even at night.

Night mode and silent operation

The lock automatically switches to Quiet Mode when it gets dark. In this mode, it operates almost silently (20 dB) and turns off sound effects, so you can go home at any time without waking up your household members.

Ideal for European doors

SwitchBot Lock Ultra was designed with European locks in mind. It supports various types of mechanisms, including Deadbolt, Jimmy Proof and Mortise (with adapter). It allows partial or full locking - fast opening during the day and maximum security at night.

Triple emergency power supply

The lock has a three-stage power system: a main battery, a frost-resistant CR123A backup battery and emergency power via a USB-C port. Even when the battery is low, the Lock Ultra allows you to unlock the door, and one charge is enough for 9 months of operation.

Opening in multiple ways

The SwitchBot Lock Ultra gives you complete freedom of access - you can use your fingerprint, NFC card, smartwatch, voice command or auto unlock function with GPS. Four types of passwords are available for families, visitors and service technicians: permanent, one-time, temporary and masked.

Full integration with Smart Home

The lock works with the Matter platform and supports Apple Home, Google Home, Amazon Alexa, SmartThings and Home Assistant (requires SwitchBot hub). This allows you to manage access, check the status of the lock and create automations from a single app.

Designed with attention to detail

The new design with full aluminum housing is half the thickness of previous models (42 mm thick) and creates a sleek, integrated unit with the door. The included overlays in three wood tones (light, medium and dark) allow you to match the lock's appearance with your interior design.

Security at the highest level

The 6-layer security system includes tamper alerts, data encryption and real-time status monitoring. In the app, you get instant notifications about the status of the door - open, closed or ajar.

Included
