

SwitchBot Vision lock keypad with facial recognition

Model: W7300500

Manufacturer: SWITCHBOT

EAN: 810150546071

Product Code: 806935

R2,791

SwitchBot Vision lock keypad with facial recognition

SwitchBot Keypad Vision recognizes a face in 1 second using iPhone-grade 3D scanning technology. It protects against fraud attempts through photos or recordings, guaranteeing secure and instant door unlocking - without touching anything.

Confident operation at any time

Built-in infrared backlighting and dual light sensors enable reliable face recognition both day and night. The device automatically switches to night mode, operating quieter than 20 dB to avoid disturbing household members.

As many as nine ways to open

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Keypad Vision supports as many as nine access methods - from face and fingerprint recognition to password, NFC, card, key, voice command, Bluetooth and smartwatch. Users can also define four types of passwords: permanent, one-time, temporary and digit-masked - ideal for family, guests or cleaning service.

Energy for the whole year

With a 5,000 mAh battery, the device requires charging only once a year. An intelligent power saving system activates the face sensor only when someone approaches the door, extending the operating time and reducing unnecessary battery consumption.

Wireless installation and high resistance

Keypad Vision requires no wiring or drilling - just stick it to the door with mounting tape. The IP65-rated housing is resistant to rain, dust, low and high temperatures, so it will be perfect for both indoor and outdoor use.

Real-time security

The lock sends alerts when tampering is attempted or the device is removed. Connection to the SwitchBot app (Hub required) allows you to remotely monitor the status of the door and manage access at any time - from anywhere.

Included

- SwitchBot Keypad Vision lock keypad
- Mounting kit (adhesive tape + screws)
- USB-C cable for charging
- User manual
