

Eversweet Max Petkit smart animal drinker/fountain

Model: Eversweet Max

Manufacturer: PETKIT

EAN: 6975069302829

Product Code: 806937

R2,996

Eversweet Max Petkit smart pet drinker/fountain.

Take care of your pet's proper hydration level. Drinking filtered water can protect your pet from kidney and urinary tract diseases and help develop healthy habits. PetKit Eversweet Max effectively eliminates impurities and does not generate annoying noise. What's more, it uses a 3-liter tank and works for about 83 days on a single charge. In addition, a dedicated app will allow you to manage and monitor the fountain's operation.

Remote operation

Monitor your pet's habits with the Petkit app. From it you will check how often and for how long your pet drinks water. By default, the device delivers water for about 25 seconds - but you can adjust its operation according to your pet's needs. The Standard mode provides continuous water distribution,

while Intermittent delivers water for 3 minutes and stops operation for another 3 minutes. The Petkit app also allows you to check the battery level and the percentage of filter usage. It will also remind you when you need to refill the water in the tank. Note: if you have more than one drinker, the distance between them should be at least 8m.

Effective filtration

Eversweet Max uses a single-sided filtration system that consists of 3 elements. A foam filter traps debris, while a cotton layer filters out food debris and dander. Activated carbon, on the other hand, eliminates odors and chlorine. As a result, you are assured that your pet is drinking clean and fresh water.

Teflon-coated tray

The water tray was created from stainless steel and has been coated with a black Teflon coating that prevents biofilm buildup, making it much easier to clean than a standard stainless steel tray. The coating contributes to a longer life of the device, and the tray's 5° slope makes it possible to effectively remove floating hair.

Refined to the last detail

The drinker was designed with attention to almost every detail. Quiet operation of 26 dB ensures that the device will not generate annoying noise, and the modular design makes it easy to maintain the fountain. What's more, light indicators provide information on the unit's operating status, and non-slip pads prevent the drinker from moving and ensure stability.

Up to 83 days of operation

Don't worry about charging the drinker too often. The Petkit Eversweet Max uses a 5000 mAh battery, which translates to about 83 days of use (when water is dispensed for 25 seconds every hour). Note that the operating time of the device will vary depending on the intensity of use. The drinker will work for about 60 days if it dispenses water for 25 seconds and then stops working for 29 minutes, for 30 days when it stops working for 13 minutes, and 15 days when it does not work for 7 minutes.
