OBDeleven 2 Pro Pack Diagnostic Scanner

OBDeleven NextGen is a state-of-the-art diagnostic tool designed for drivers and car enthusiasts who want a simple way to take care of their car. The device connects to your phone via Bluetooth and works with the OBDeleven app to provide full access to your vehicle's systems through cloud-based software. With its help, you can instantly diagnose faults, monitor operating parameters and personalize your car's functions - all with just a few clicks on your smartphone screen. Intuitive operation and a compact, pocket-sized form factor make OBDeleven NextGen the perfect companion for any driver, regardless of skill level.

Diagnostics without borders

OBDeleven NextGen provides its full diagnostic capabilities for VAG, BMW and Toyota cars. Other brands are supported in terms of basic diagnostics and fault clearing capabilities. The system runs on Android, iOS and Huawei systems. This allows users to enjoy full compatibility regardless of the

type of device they have. This tool does not require specialized knowledge or experience - just connect the scanner to the OBD-II port and launch the app to start analyzing the condition of the vehicle. OBDeleven offers convenience, mobility and reliability encased in a sleek, minimalist design.

Smart features and savings

With OBDeleven NextGen, diagnostics becomes simpler and more economical. The device allows you to monitor key data in real time, track faults and clear fault codes without having to visit a workshop. This allows the user to respond quickly to potential problems, saving time and money. The personalization function, on the other hand, allows the user to customize the vehicle's behavior according to individual preferences - from lights to driver assistance systems.

One-click personalization

With One-Click Apps, vehicle owners can easily activate or deactivate selected car features, such as daytime running lights, clock test, parking sensors or "video in motion" mode. In just a few moments you will customize your car with ready-made solutions designed by OBDeleven experts. The extensive database of applications is constantly updated and available for vehicles of brands belonging to the Volkswagen, BMW, MINI and Rolls-Royce groups.

Professional capabilities with OBDeleven PRO Pack

The annual OBDeleven PRO Pack plan is an enhanced version of the NextGen device, designed for more advanced users and workshops that need full access to Volkswagen Group (VAG) vehicle systems. The package includes the OBDeleven NextGen scanner and a 12-month VAG PRO plan, which unlocks a number of additional diagnostic and configuration features. The PRO version not only allows users to read and clear errors, but also perform VAG Coding, system adaptations, and use the SFD Unlock feature, which allows access to secure vehicle modules. Users can also use One-Click Apps (via Credits) and analyze vehicle data in real time. OBDeleven PRO Pack combines ease of use with a professional range of capabilities - an ideal tool for enthusiasts and service centers that want to fully control the car's settings.
