OBDeleven 2 Ultimate Diagnostic Scanner

OBDeleven NextGen is a state-of-the-art diagnostic tool designed for drivers and car enthusiasts who want a simple way to take care of their car. The device connects to your phone via Bluetooth and works with the OBDeleven app to provide full access to your vehicle's systems through cloud-based software. With its help, you can instantly diagnose faults, monitor operating parameters and personalize your car's functions - all with just a few clicks on your smartphone screen. Intuitive operation and a compact, pocket-sized form factor make OBDeleven NextGen the perfect companion for any driver, regardless of skill level.

Diagnostics without borders

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

OBDeleven NextGen provides its full diagnostic capabilities for VAG, BMW and Toyota cars. Other brands are supported in terms of basic diagnostics and fault clearing capabilities. The system runs on Android, iOS and Huawei systems. This allows users to enjoy full compatibility regardless of the type of device they have. This tool does not require specialized knowledge or experience - just connect the scanner to the OBD-II port and launch the app to start analyzing the condition of the vehicle. OBDeleven offers convenience, mobility and reliability encased in a sleek, minimalist design.

Smart features and savings

With OBDeleven NextGen, diagnostics becomes simpler and more economical. The device allows you to monitor key data in real time, track faults and clear fault codes without having to visit a workshop. This allows the user to respond quickly to potential problems, saving time and money. The personalization function, on the other hand, allows the user to customize the vehicle's behavior according to individual preferences - from lights to driver assistance systems.

One-click personalization

With One-Click Apps, vehicle owners can easily activate or deactivate selected car features, such as daytime running lights, clock test, parking sensors or "video in motion" mode. In just a few moments you will customize your car with ready-made solutions designed by OBDeleven experts. The extensive database of applications is constantly updated and available for vehicles of brands belonging to the Volkswagen, BMW, MINI and Rolls-Royce groups.

Maximize your possibilities with OBDeleven ULTIMATE Pack

The annual OBDeleven ULTIMATE Pack plan is the most extensive version of the device, designed for professionals and automotive enthusiasts who want full functionality and unlimited access to all diagnostic tools. The kit includes the OBDeleven NextGen scanner, a 12-month ULTIMATE VAG plan, and practical accessories - an elegant protective case and a phone holder. The ULTIMATE version offers a full range of diagnostic and configuration capabilities: fault reading and clearing, real-time data analysis, VAG coding, adaptations, access to secure SFD modules and unlimited access to One-Click Apps without Credits. It's a complete solution for users who want to fully manage their vehicle's features and personalization with the most advanced package in the OBDeleven ecosystem.
