OBDeleven 3 Diagnostic Scanner (100 credits)

OBDeleven 3 is a compact, wireless diagnostic scanner that allows drivers to easily analyze, configure and control their cars. All you need to do is plug the device into an OBD2 slot, launch the mobile app and connect via Bluetooth. No cables, laptop or visit to the service center - full diagnostics available from your smartphone!

Full compatibility and precision

The device is officially licensed by Volkswagen (VAG), BMW, Toyota and Ford groups (US models), which guarantees reliable readings and access to all vehicle systems. OBDeleven 3 works with popular brands such as Audi, Škoda, SEAT/CUPRA, MINI, Rolls-Royce, Lexus, Ford and many others, providing drivers with global compatibility and superior diagnostic accuracy.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Faster communication and wider capabilities

Using the second generation of the 5x CAN-FD interface, OBDeleven 3 supports modern vehicle systems with greater speed and accuracy. This means faster scanning, greater compatibility with new models, and more complete control over vehicle functions. The device is also equipped with a power-saving mode, so it can be safely left plugged into the OBD2 connector permanently - without the risk of draining the battery.

Easy step-by-step operation

To get started, all you have to do is plug the OBDeleven 3 into the OBD2 socket, download the mobile app (Google Play, App Store or AppGallery) and pair the device with your phone via Bluetooth. The whole process takes a few minutes, and the app will intuitively guide you through the setup.

Diagnostics and real-time data

OBDeleven 3 allows you to scan, read and debug engine, transmission and other systems in vehicles with CAN bus (2008 and above). Advanced diagnostics for all vehicle systems is also available for VAG group brands, BMW, Toyota and Ford, allowing detailed fault analysis. Users can also monitor real-time data such as engine speed, coolant or oil temperature.

Personalization and coding functions

With One-Click Apps, users of Volkswagen, BMW, Toyota and Ford can easily adjust comfort and safety settings, reset service reminders or activate hidden features - all with a few taps of the screen. More advanced users can use manual coding and adaptation (for VAG vehicles), giving full control over the car's systems.

Vehicle data and additional features

OBDeleven 3 provides instant access to key vehicle information - VIN number, year of manufacture, mileage, engine code or body type. For cars from the Volkswagen, BMW and Toyota groups, the app also shows factory components and equipment options, such as engine, transmission, battery and

more. OBDeleven 3 also offers inspection of hybrid and electric batteries (for Toyota and Lexus) - allowing real-time monitoring of cell temperature and balance. In addition, the Car Buying Assistant feature helps when buying a used car, allowing you to verify the vehicle and identify potential problems before purchase.

Choose a plan that fits you

OBDeleven 3 offers three subscription levels: FREE, PRO and ULTIMATE, allowing each user to select the range of features to suit their needs. Under the FREE plan, you get access to basic but extremely useful diagnostic tools - you can scan, read and clear OBD2 errors, use advanced diagnostics and monitor data in real time. In addition, you can activate One-Click Apps using the app's internal currency (Credits). This is ideal for drivers who want to get to know their car better, monitor its technical condition and make minor modifications - without investing in more expensive subscription plans. With the purchase, you get 100 credits to use at the start.

Manufacturer	OBDeleven
Model	OBDeleven 3
Communication interface	Bluetooth
Support for protocols	CAN, CAN-FD
Power supply	OBD2 sockets (12 V)
Energy saving mode	Yes
