

Freewell filter set for DJI Mini 5 Pro All Day

Model: FW-MN5-ALD

Manufacturer: FREEWELL

EAN: 4897143171355

Product Code: 807005

R1,700

Freewell Filter Set for DJI Mini 5 Pro All Day

The Freewell Filter Set for DJI Mini 5 Pro All Day is the ideal choice for filmmakers who want to maintain full control over exposure in all lighting conditions - from cloudy days to intense sunlight. It comes with six professional ND filters for natural tonal transitions, soft motion effects and cinematic smoothness in outdoor shots. It's perfect for aerial filming, landscape photography and creating professional video footage.

Precise light control

The kit includes ND16, ND32, ND64, ND256, ND512 and ND1000 filters to gradually reduce the amount of light reaching the sensor. Thanks to them, you can freely adjust exposure and shutter speed to the lighting conditions, maintaining smooth movement and natural blurring of dynamic elements of the frame. The ND1000 filter blocks as much as 10 degrees of light, allowing you to achieve long exposure times when shooting in harsh sunlight.

Cinematic quality shots

Freewell's ND filters help achieve a professional, cinematic look to your footage by allowing you to control shutter speed and depth of field. Thanks to precise optical calibration, images retain high detail, contrast and saturated colors - without excessive reflections or overexposure. It's a kit made for cinematic motion shots, smooth panoramas and aerial footage.

Cleanliness and lens protection

Each filter is made of high-quality optical glass with high light transmission and low distortion. Multi-layer anti-reflective coatings ensure excellent sharpness, natural color reproduction and effective lens protection from dust, dirt and scratches. Freewell ND filters help keep the optics clear even during heavy use in the field.

Stability and security

Each filter has been precisely matched to the design of the DJI Mini 5 Pro. The ultra-lightweight design and certified Gimbal-Safe Design ensure a secure fit without affecting the balance and performance of the gimbal. This allows you to record smoothly and steadily without the risk of shake or image distortion.

Included

- ND16 filter
- ND32 filter
- ND64 filter
- ND256 filter
- filter ND512
- ND1000 filter
- protective case
