

Freewell filter set for DJI Mini 5 Pro Bright Day

Model: FW-MN5-BRG

Manufacturer: FREEWELL

EAN: 4897143171362

Product Code: 807006

R1,995

Freewell filter set for DJI Mini 5 Pro Bright Day

The Freewell Filter Set for DJI Mini 5 Pro Bright Day is a professional accessory designed for filming and photography in strong daylight. It includes six ND/PL filters that combine exposure reduction and polarization functions to provide superior control over light, reflections and color. With these, you'll capture clear, high-contrast and saturated shots in harsh sunlight - perfect for outdoor and aerial work.

Balanced exposure with polarization

The kit includes ND8/PL, ND16/PL, ND32/PL, ND64/PL, ND128/PL and ND256/PL filters, which effectively reduce the amount of light reaching the sensor while eliminating unwanted reflections. This enables natural exposure and cinematic smoothness of motion even in the sunniest conditions.

Professional ND256/PL effect without reflections

The ND256/PL filter allows you to work creatively with long exposure times while maintaining polarization. It allows you to create striking, smooth motion shots - from blurred waves and clouds to dynamic movie panoramas. It will give you a cinematic aesthetic in any light. The integrated polarizing layer minimizes glare from water, glass or metal, improving color saturation and contrast. This gives your recordings a natural look and realistic color depth, regardless of the angle of the light. It's a great way to eliminate overexposure and highlight details in bright parts of the frame.

High optical quality and stability

The filters are made of high-transparency multilayer optical glass, which guarantees sharpness, accurate color reproduction and minimal distortion. The lightweight CNC aircraft aluminum frames are fully compatible with the DJI Mini 5 Pro gimbal, ensuring stable, safe operation without affecting the drone's balance.

Included

- ND8/PL filter
- ND16/PL filter
- ND32/PL filter
- ND64/PL filter
- ND128/PL filter
- ND256/PL filter
- protective case
- cleaning cloth

Compatibility	DJI Mini 5 Pro
Type of filters included	ND/PL (neutral density with polarization)
ND density range	ND8/PL, ND16/PL, ND32/PL, ND64/PL, ND128/PL, ND256/PL
Optical material	HD optical glass with anti-reflective and polarization coating
Frame	CNC aircraft aluminum, corrosion resistant
Gimbal-Safe design	Compatible with DJI Mini 5 Pro gimbal
Resistance	Against scratches, dust, glare and UV radiation

Weight of a single filter Approximately 0.7-1.0 g
