Fanttik S1 Apex Deluxe Electric Screwdriver

The Fanttik Fold S1 APEX Deluxe is a versatile electric screwdriver with an intuitive LED display, torque adjustment and four-angle handle adjustment. With 20 S2 bits, a magnetic case and a capacious battery, it is a tool suitable for a variety of assembly and repair tasks.

Precise torque adjustment

The device allows you to set the torque from 0.5 to 7 Nm, selectable in 8 levels via an adjustment ring. The LED (Light Emitting Diode, light emitting diode) display shows the current torque and the battery charge level, providing full control over the working parameters.

Foldable handle

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The articulating mechanism allows you to set the handle at 0°, 24°, 48° or 72°, which makes it easier to access hard-to-reach places and increases the ergonomics of work. Such a solution reduces hand fatigue during prolonged use.

Two speed modes

The screwdriver offers two speed modes - 100 rpm and 250 rpm - selectable by a button on the housing. This makes it possible to adjust the speed to suit the type of screws and materials, preventing damage.

Magnetic case and bit set

The set includes 20 of the most commonly used bits made of hardened S2 steel (S2 alloy steel), placed in dedicated locations. The magnetic case protects the tools from getting lost and makes it easy to stay organized.

Powerful battery and lighting

The built-in 2,500 mAh lithium-ion rechargeable battery allows for long operation without frequent charging. The USB-C (Universal Serial Bus Type-C, a universal connector for data and power) port is compatible with popular chargers. The integrated LED (Light Emitting Diode, a light-emitting diode) light turns on automatically, making it easier to work in low-light areas.

Included

- electric screwdriver
- magnetic case
- S2 x20 bits
- USB-A to USB-C cable
- instruction manual
