Fanttik C8 Nano Electric Cutting Machine

The Fanttik C8 Nano is a cordless electric cutter designed for professionals such as designers and tailors, as well as DIY and DIY (Do It Yourself) enthusiasts. The device is equipped with three speed levels, which allows you to precisely adjust the cutting power to the type of material being worked on. Such a solution increases control over the work process and allows you to achieve clean, even edges in both thin and thicker plastics.

High cutting power

The high magnetic force motor generates speeds of up to 250 rpm, providing 15% more cutting power compared to standard models. The device easily handles cardboard, carpet, leather, rope, or technical paper, making it a versatile tool for the workshop and home work.

Fast charging and long working time

The Fanttik C8 Nano features a rechargeable battery that you can charge in as little as one hour using the included USB-C (Universal Serial Bus Type-C, a universal connector for data and power) cable. A full charge provides up to 40 minutes of uninterrupted operation, effectively allowing you to complete even larger projects without interruption.

Simple and safe blade replacement

The device uses an EasySwap system with a spindle locking mechanism, which allows quick blade replacement. A special metal tool is included to facilitate this process, and the whole procedure is quick and without risk of injury. The locking mechanism protects against accidental start-up of the cutter during blade replacement, which increases the safety of use.

Easy-to-read display

The Fanttik C8 Nano is equipped with a large circular LED (Light Emitting Diode) display with a diameter of 35 mm. The screen continuously shows the battery charge level and the currently selected speed mode. In addition, the built-in high-brightness LED effectively illuminates the cutting line, making it much easier to work in low-light conditions or in hard-to-reach places.

Included

- electric cutter
- charging cable
- blade replacement wrench
- blade x2
- storage bag
- instruction manual
