

Garret ACE 250 metal detector

Model: 1139070

Manufacturer: GARRETT

EAN: 786156002715

Product Code: 807370

R6,728

Garret ACE 250 metal detector

The Garrett ACE 250 is a reliable metal detector designed for users who want efficiency, intuitive operation and full control over the search process. It's great for both beginners and more experienced searchers, offering features that make a real difference in comfort and efficiency in the field. The Garrett ACE 250 combines functionality with affordability and reliability.

Precise target localization

The integrated electric targeting function allows you to pinpoint the exact location of an object, significantly reducing extraction time and unnecessary digging. This is a solution you will appreciate especially when searching for small coins and small objects. From now on, nothing will escape your attention.

Full control over detection

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The Garrett ACE 250 offers up to 5 search modes with predefined discrimination patterns, which you can also customize. Choose from custom, metal (zero), jewelry, relic, coin, and pinpoint modes. Accept/Reject Discrimination and Notch Discrimination allow you to modify the discrimination patterns, allowing you to ignore unwanted objects and focus only on interesting finds.

Clear control panel and intuitive operation

A large LCD screen with an expanded Target ID legend presents clear and easy-to-read information about the type of object detected. Operation of the device is based on buttons that perform their functions at a single press, making changing settings quick and convenient even in difficult field conditions.

Real-time control of the device

The built-in continuous coin depth indicator allows you to determine the approximate depth of the coin, and the charge status indicator keeps you informed of the power level, eliminating the risk of unexpected interruption.

Comfort, mobility and fit

The ACE 250 is designed with ergonomics and comfort in mind. It features a 3-piece design for easy transport and storage, the ability to fold down to 24" in length, and compatibility with the ACE Series interchangeable coils. An adjustable armrest provides stability, and a 1/4" headphone jack is essential for comfortable operation in noisy environments.

ACE™ control panel

The control panel offers full access to key functions. It gives you a choice of search modes including Pinpoint, Notch discrimination adjustment, coin depth indicator, precise target tracking and simple and responsive operation. The Garrett ACE 250 is a detector that lets you explore with passion, confidence and satisfaction - whether you're combing the beach, forest or field.
