

Garrett ACE 300i metal detector

Model: 1141450

Manufacturer: GARRETT

EAN: 786156004801

Product Code: 807371

R7,796

Garrett ACE 300i metal detector

The Garrett ACE 300i is a versatile metal detector that will be perfect for both first-timers and more experienced enthusiasts. It combines intuitive operation with advanced detection features, offering precision, stability and comfort in all field conditions. If you're looking for a detector that combines ease of use with professional capabilities - you've just found it!

Stable operation without interference

With the ability to adjust the frequency, you can effectively eliminate or minimize interference caused by electrical sources and other metal detectors. This is especially useful when searching in crowded areas, at detectorist rallies or in areas with high signal intensity.

Precise target identification and analysis

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The Garrett ACE 300i is equipped with advanced tools that enhance accuracy and convenience. Digital Target ID is a digital identification scale from 0 to 99 that determines the conductivity of a metal and makes it easier to identify. All-Metal static mode enables highly accurate object localization without moving the coil. The increased resolution (more pixels) allows more precise control of the iron discrimination level, which is especially helpful in areas littered with metal waste. And the Graphic Target Analyzing™ function simultaneously displays the object's conductivity and current discrimination pattern, giving you full control over target analysis.

Efficiency in treasure hunting

With a higher operating frequency and improved iron resolution, the ACE 300i excels at finding gold coins and silver jewelry. When the device detects an object, it picks up its magnetic field and will immediately inform you with an audible and visual signal.

Five operating modes to suit the terrain

The detector offers 5 search modes that allow you to match the device's operation to the type of search. Choose from Zero Discrimination, Jewelry, Custom, Relics, Coins and the Electronic Pinpointing function for precise targeting. From now on, nothing will escape your attention.

Waterproof coil and convenience of use

The Garrett ACE 300i features a 7" x 10" coaxial coil that is waterproof, allowing you to search even in wet areas and shallow coastal areas. This guarantees greater range and stable operation in more difficult conditions.

Simple operation and easy-to-read LCD display

An intuitive control panel makes the device extremely easy to use. The LCD display shows, among other things, the target legend, indicating the type of coin, the depth of the object, or the currently selected operation mode. The pinpoint function allows you to find the target faster, resulting in more efficient and satisfying searches.

Included

- metal detector
- Easy Stow headphones
- metal detector cover
- coil cover
- instruction manual

Manufacturer	Garrett
Model	ACE 300i
Digital target identifier (scale from 0 to 99)	Supported
Iron discrimination segments	4
Notch discrimination	Adjustable
One button treasure hunt	Supported
Search modes	5 (plus Pinpoint)
Sensitivity / depth adjustments	8
Pinpoint function	Supported
Frequency	8 kHz, adjustable
Camlock locks for greater stability	Supported
Audio identification levels	3
Target depth indicator	Supported
Battery status indicator	Built-in
Search coil	7" x10" coaxial, PROformance
Headphones included	Yes
Length (adjustable)	1.06 m - 1.29 m
Operating temperature range	18° C - 55° C
Storage temperature	-29° C - 66° C
Total weight	1.27 kg
Batteries	4 AA (included)

Gross weight: 2350, Box length: 55,00, Box width: 27,00, Box height: 12,50, Net weight: 1900,
