

Garrett AT Pro- International metal detector

Model: 1140560

Manufacturer: GARRETT

EAN: 786156003934

Product Code: 807373

R15,162

Garrett AT Pro-International metal detector

The Garrett AT Pro-International is a detector that combines advanced technology with intuitive operation and robust design. It provides full control over the detection process, increases the efficiency of the search and allows you to derive true satisfaction from every expedition discovery - regardless of the conditions. It's equipment that allows you to focus on what's most important: the excitement of finding the story hidden beneath the surface.

Ready for land and water

The Garrett AT Pro-International was created for true treasure hunters who refuse to compromise. Its fully waterproof design allows it to operate in wet terrain, mud and shallow water up to 3 meters deep, opening up entirely new possibilities for exploration - from beaches and riverbanks to marshy meadows and oxbow lakes. What's more, the AT Pro includes an 8.5" x 11" PROformance™ DD coil for precise target finding, even in challenging conditions.

Speed, precision and effectiveness in any terrain

Thanks to its high response speed, precise target separation and high detection depth, the AT Pro performs well even in difficult locations with lots of metal debris. It's an all-terrain detector that provides stable and repeatable results for beginners and experienced users alike.

Proportional Audio - hear more, understand better

Advanced Proportional Audio modes capture subtle differences in a target's signal, making it easier to assess its size, shape and depth. The Tone Roll Audio function further enhances conductivity analysis, helping you more accurately identify your find even before digging. For those new to metal detecting, there are also three Standard Audio modes, which offer consistent, full signals regardless of the strength of the reflection - ideal for learning and gradual skill development.

AT MAX™ Iron Audio - hear before you dig

The Iron Audio function allows you to listen to pre-filtered iron signals, making it easier to distinguish valuable targets from unwanted waste, such as caps or washers. With the right discrimination level set (e.g., Iron Discrim at 35), you gain real control over what's actually under the coil - with a distinctive "iron murmur" warning you of an unwanted target.

Headphones to complete the set

You get professional Garrett MS-2 headphones with volume control, comfortable headband and soft ear cups. They effectively isolate ambient sounds, making it easier to pick up weak signals and improve concentration during long search sessions.

Features that make a difference

The Garrett AT Pro-International is equipped with a set of powerful technologies to enhance precision. High-Res Iron Discrimination offers 40 levels of iron discrimination to accurately separate valuable targets from metal scrap. With Fast Track Ground Balance, you can count on automatic, fast tuning to mineralized ground. Digital Target ID (0-99) is a numerical identification of metal conductivity. And Electronic Pinpointing is an all-metal precision target locating mode without

moving the coil

Included

- metal detector
- headphones
- coil
- user manual

Manufacturer	Garrett
Model	AT Pro-International
Z-Lynk™ Wireless (integrated)	No
Iron discrimination segments	40
True All-Metal mode	None
Backlighting	None
Volume control	None
Notch discrimination	Adjustable
Search modes	6 (3 standard, 3 advanced)
Proportional sound	Supported
Fast recovery speed	Supported
Sensitivity/depth adjustment	8
Iron Audio™ (discrimination modes)	Supported
Standard binary audio	Supported
Threshold adjustment	None
Digital target identifier	Supported
Ground balance, automatic/manual	Supported
Ground Balance Window™	No
Precision Pointing	Supported

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Water Resistance	Up to 3 m
Frequency	15 kHz, adjustable
Sound identification levels	3
Target depth indicator	Built-in
Search coil	8.5" x 11" DD PROformance™
Length (adjustable)	1.09 - 1.4 m
Operating temperature range	-18° C - 54° C
Storage temperature	-29° C - 65° C
Total weight	1.4 kg
Batteries	4AA (included)
Battery status indicator	Built-in

Gross weight: 3000, Box length: 54,50, Box width: 36,00, Box height: 14,00, Net weight: 2350,
