

Garrett Pro-Pointer II Pinpointer Handheld Metal Detector

Model: 1166050

Manufacturer: GARRETT

EAN: 786156004610

Product Code: 807375

R3,420

Garrett Pro-Pointer II Pinpointer Handheld Metal Detector

Meet the Garrett Pro-Pointer II handheld metal detector - a reliable tool for treasure hunters that significantly increases accuracy and speed in the field. Lightweight, handy design, intuitive operation and exceptional sensitivity make the device perfect for both beginners and experienced users. If you value precision, speed and reliability in all conditions, this tool will become your indispensable partner in discovering what is hidden.

Proportionate sound and vibration

Garrett's patented technology provides proportional audio and vibration that intensifies as you approach your target. This allows you to flawlessly sense the exact location of metal, even in difficult

terrain, and quickly distinguish several small objects from one large find.

Complete scanning control

The 360° detection field around the tip allows you to comprehensively scan every range around the spike. With minimal movement, you'll pinpoint a precise point, significantly speeding up target location and extraction. In addition, the Fast Retune function allows for instant fine-tuning by quickly turning it on and off. This will silence interference from salt water, wet sand or highly mineralized soil, as well as accurately pinpoint the location of large targets and separate closely spaced objects.

Resistant to water and dust

The Pro-Pointer II meets the IEC 60529 IP66 standard, which means high protection against water and dust. The tip can be submerged, and the entire unit works safely in the rain or under running water while rinsing. Whatever the conditions, you can operate with complete peace of mind and count on satisfactory results.

Excellent visibility in difficult conditions

The built-in LED flashlight improves comfort in low light, offering up to 2 to 6 times longer battery life compared to other metal detectors with backlighting. It is perfect for working after dark and in shady areas.

Lost alarm and power saving

After 5 minutes without a button, the Pro-Pointer II activates periodic warning signals to help you quickly find the device you left behind. In addition, after 60 minutes of such signals, it automatically shuts off, extending battery life.

Thoughtful design and easy use

Increased durability goes hand in hand with practical transportation solutions. The lightweight design allows the device to be clipped to a belt, finder bag or detector. And one-touch operation eliminates complicated settings and makes the device instantly ready for use. That's convenience and

accessibility for any level of sophistication.

Manufacturer	Garrett
Model	Pro-Pointer II
Operating temperatures	From -20°C to 54°C
Operating frequency	2 kHz
Protection class	IP66
Tuning	Automatic or manual tuning
Indicators	Proportional frequency of sound/vibration pulses
Controls	Power switch
Dimensions	Length: 22.9 cm; thickness: 3.8 cm (tapers to 2.2 cm)
Weight	0.2 kg with battery
Rechargeable battery	Single 9-volt rechargeable battery
Battery life	Carbon: 16 hours; alkaline: 30 hours; rechargeable: 8 hours
Standards	FCC, CE, ROHS, ICNIRP, IEC 529-IP 66

Gross weight: 320, Box length: 24,00, Box width: 6,00, Box height: 5,50, Net weight: 250,
