

Carlinkit TBOX ULTRA Carplay&Android wireless adapter

Model: TBOX ULTRA

Manufacturer: CARLINKIT

EAN: 6972185561055

Product Code: 807396

R5,453

Carlinkit TBOX ULTRA Carplay&Android Wireless Adapter

Carlinkit TBOX Ultra is an advanced wireless adapter that transforms your car's factory multimedia system into a full-fledged entertainment and navigation platform. The device runs on Android 15.0 and is equipped with an octa-core Qualcomm SM6350 processor, which guarantees smooth application operation and quick access to online functions. Thanks to its integration with CarPlay and Android Auto, the adapter enables wireless connection to a smartphone, offering convenience of use without the need for cables. SIM card and Wi-Fi hotspot support allows for a permanent internet connection, even while driving.

Modern technology and fast connectivity

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The built-in 4G modem supports a wide range of LTE-FDD, LTE-TDD, and WCDMA bands, ensuring a stable mobile connection in almost every region of the world. The device works with operators in Europe, North America, Asia, and Japan. In addition, support for Wi-Fi in 802.11 a/b/g/n/ac (2.4G + 5G) and Bluetooth 5.1 standards allows for reliable wireless connectivity with other devices. This allows the TBOX Ultra to stream music, make calls, and use Internet services without interference.

Extensive navigation capabilities

The adapter is equipped with a global positioning system (GPS) with support for GPS, GLONASS, BeiDou, and Galileo. This ensures fast and accurate location determination, which translates into effective navigation application performance even in difficult road or urban conditions.

Fully functional Android platform

TBOX Ultra offers an open Android platform with the ability to download applications directly from a dedicated store. Users have complete freedom to personalize the system – from installing music apps and instant messengers to vehicle management tools. The device has 8 GB of RAM and 128 GB of fast UFS internal memory, expandable to 512 GB using a Micro SD card.

Wide compatibility and easy installation

The device is compatible with most vehicles factory-equipped with wired CarPlay or Android Auto. It supports wireless connection with iPhones from model 6 (iOS 10.0+) and smartphones with Android 11.0 or newer. The connection is made via a USB-C connector, and thanks to an intuitive switch, the user can easily change the operating mode between CarPlay and Android Auto. The housing is made of durable ABS plastic. Its compact dimensions (90 x 84.9 x 17.1 mm) allow the device to be easily hidden in a glove compartment or center console.

Included

- 2x USB-C to USB-C data cable, USB-A to USB-C
- dual USB power cable
- user manual
