

Lifting RF facial massager ANLAN 01- ADRY31-01E

Model: 01-ADRY31-01E

Manufacturer: ANLAN

EAN: 6953156301764

Product Code: 807406

R3,067

ANLAN 01-ADRY31-01E lifting RF facial massager

This compact skin care device for the face and neck combines several technologies: RF radio waves, EMS microcurrents, ion therapy, LED therapy, and a cooling and heating function. Each mode of action is designed to address specific skin needs - from deep pore cleansing, to hydration and collagen stimulation, to lifting effects and soothing the skin after treatment. The device features a flat, 18K gold-coated head that distributes energy evenly and is gentle even on very sensitive skin. It can successfully replace several different cosmetic devices, allowing you to carry out comprehensive skin care at home.

Advanced skin cleansing

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

In Clean mode, the device uses positive ions and gentle heat to open pores and help remove impurities. This makes the skin better prepared for further skin care steps. Vibrations support the cleansing process, and the use of cotton pads and micellar lotion is recommended for better results.

Deep hydration

Moist mode works by using negative ions and micro-vibrations to support the absorption of active ingredients from serums or essences. Temperature and frequency control promote deep hydration, improving overall skin texture and increasing elasticity.

Strengthen and firm the skin

Firm mode uses radiofrequency (RF) waves at 2 MHz to reach the deeper layers of the skin. With a six-pole RF electrode, the energy is distributed evenly, providing effective tissue heating and stimulating collagen production. The result is firmer, smoother skin.

Microcurrents for a lifting effect

In Lift mode, the device stimulates facial muscles with EMS microcurrents. The gentle pulses stimulate circulation and promote natural skin tone, resulting in improved facial oval and lifted contours.

Soothing cooling

Cool mode uses a rapid cooling function that lowers the temperature of the head within three seconds. It has a soothing effect, reduces the visibility of pores and helps to consolidate the effects of previous treatments. The 18K gold elements used support both cooling and heating functions.

PMR technology

The device uses enhanced PMR technology, which combines 2 MHz constant frequency waves with low-frequency pulsed current and differentiated waveforms. This combination provides effective yet gentle anti-aging treatment even in the deeper layers of the skin.

Flat head coated with 18K gold

The use of a flat head reduces friction, which is especially important for those with sensitive skin. The 18K gold coating works gently, without causing irritation, and is durable and easy to clean. This solution promotes daily use without the risk of allergies.

Manufacturer	Anlan
Model	01-ADRY14-10A
Dimensions	approx. 171 × 52 × 50 mm
Weight	approx. 178 g
Material	ABS
RF frequency	1 MHz
Light wavelength	Red light: approx. 621 nm
	Blue light: approx. 461 nm
Speed of the vibration motor	approx. 14,000 revolutions per minute (RPM)
Temperature range	Warm mode: approx. 38°C - 40°C - 42°C
	Cool mode: approx. 18°C - 16°C - 14°C
Battery capacity	1500 mAh
Charging	USB-C connector
Operating time	Up to 150 minutes
Charging time	approx. 90 minutes
Power supply	DC 5V - 2A
