R2,236

DarkFlash AIRNOVA computer case (white) + 3 fans

DarkFlash AIRNOVA is a spacious Big Tower case that supports E-ATX, ATX, M-ATX, and ITX motherboards, offering space for graphics cards up to 395 mm in length and CPU coolers up to 175 mm in height. It is equipped with ventilation panels with a large 5x5 mm mesh, 3 120 mm fans, and support for water cooling up to 420 mm. The top panel has all the necessary connectors: two USB 3.0 ports, HD Audio input, Power and Reset buttons, and a fast USB Type-C Gen2 (10 Gbps) connector, which significantly improves data transfer.

Effective cooling

AIRNOVA has been designed with an emphasis on free airflow. 5x5 mm ventilation grilles are located on six sides of the case, which supports effective heat dissipation. Inside, there is room for three 120

mm fans at the bottom, and a total of up to 10 fans can be installed. The case is also compatible with water cooling – a 420 mm radiator can be installed at the front and a 360 mm radiator at the top.

Practical mounting solutions

AIRNOVA offers a modular design with a quick-release system. All panels – including the fan frame, dust cover, and motherboard tray – are removable. This facilitates installation, cleaning, and access to components. In addition, there is 33 mm of space for cable routing at the rear, ensuring an aesthetic and tidy installation.

Dust protection

DarkFlash AIRNOVA is equipped with 4 dust filters that effectively protect the interior of the case from contaminants such as dust, hair, and fine pollen. The filters are made of densely woven nylon, which traps up to 98% of contaminants, significantly extending the life of the components and reducing the need for frequent cleaning. Each of the filters – located on the top, bottom, and side panels – is easy to remove thanks to magnetic clips and a slide-out system.

Included

- computer case
- fan x3
