

GameSir G7 Pro WC Wuchang Edition wireless controller

Model: G7 Pro WC

Manufacturer: GAMESIR

EAN: 6936685223219

Product Code: 807595

R2,996

GameSir G7 Pro WC Wuchang Edition wireless controller

GameSir G7 Pro WC Wuchang Edition is a wireless controller designed for gamers who want not only precision and reliability, but also unique style inspired by the world of Wuchang. Three modes of connectivity (Bluetooth, USB-C and 2.4 GHz) ensure broad compatibility with Xbox, Nintendo Switch, Switch 2, Android, iOS and PC, while the precision Hall-effect sticks and faders eliminate drift issues and offer exceptional control accuracy. A built-in 6-axis gyroscope and dual HD vibration motors with adjustable intensity deepen the immersion and let you feel every movement in the game. Turbo function increases the speed of response, interchangeable ABXY buttons allow you to tailor the layout to your preferred playing style.

Collector's Edition inspired by Wuchang: Fallen Feathers

The GameSir G7 Pro WC Wuchang Edition controller is the result of an official collaboration with the developers of Wuchang: Fallen Feathers. The design draws on the power of Wuchang's combat skills and the dragon armor motif from the "Draconic Resurgence" costume, creating a unique, atmospheric design with a distinct, ethereal silhouette. Layered UV resin textures accentuate the depth of the design and give the surface a refined finish that catches the eye of not only gamers, but also collectors. This is no ordinary pad - it is an element of the game world brought to reality, which combines the functionality of premium hardware with an artistic character inspired by the Wuchang universe.

Wide compatibility - including with Xbox

The GameSir G7 Pro WC Wuchang Edition is the brand's first wireless controller designed for Xbox consoles. It allows you to start the console with a single button - without reaching for the system pad or remote control. With three connectivity modes, you can play wirelessly via 2.4 GHz or wired on Xbox and PC, and connect via Bluetooth to Android devices. It's a solution that gives you complete freedom to switch between platforms and gaming scenarios - from the couch in front of the TV to mobile gameplay - while maintaining the stable connection and fast response you really want in dynamic sessions.

Next-generation precision

The MAG-RES™ TMR sticks provide the smoothness and linear sensitivity known from classic potentiometers, while incorporating the durability of Hall Effect technology, resulting in stable performance and minimizing the risk of drift. The controller operates at a refresh rate of 1,000 Hz, is equipped with a 12-bit ADC and a resolution of 4,096 levels, which guarantees lightning-fast response and extremely accurate reproduction of movements. The use of independent vibration zones in the grips and triggers allows for a more precise feeling of in-game actions - from subtle vibrations to intense impact effects. Modules with a lifespan of up to 5 million cycles make the hardware ready for many hours of intense gaming. A built-in gyroscope with mapping function (PC) allows you to assign motion control to sticks, buttons or mice, increasing personalization options, while analog triggers with Hall effect and mechanical micro switch stops offer a choice between smooth control and ultra-fast response - ideal for games requiring reflex and precision.

Play the way you like

The GameSir G7 Pro WC Wuchang Edition gives you a real advantage with its extensive customization options and precise response. Four additional buttons - including two rear locking buttons and two mini bumpers - allow you to instantly assign key actions and customize the controls to your preference. An interchangeable magnetic front panel (removable in three parts) allows you to quickly change the look of the controller, while a resizable mechanical D-pad cross-pad and ABXY optical buttons guarantee clear, precise clicks. A refresh rate of 1,000 Hz (over cable and 2.4 GHz) ensures ultra-fast response in PC games, while four vibration motors enhance the realism of gameplay. Everything is complemented by a powerful 1,200 mAh battery, which can be conveniently recharged either through the USB port or via a dedicated docking station. There's also a 3.5mm audio jack for connecting headphones and rubberized, textured grips with an engraved surface for a more secure grip even during the most dynamic clashes.

Full control over every movement - GameSir Nexus

With the dedicated GameSir Nexus app, the G7 Pro WC Wuchang Edition controller becomes a fully customized tool for your playing style. The software allows you to precisely adjust gyroscope sensitivity, knob curves, dead zones and button mapping - including assigning mouse functions to selected controller (PC) elements. This allows you to set the exact responsiveness and control character that works best for shooters, racing or action games.

Included:

- Wireless controller
- Charging station with Smart Auto Start-Stop function
- Additional D-pad x2 crosspads (different shapes)
- 2.4 GHz wireless adapter (dongle)
- 3m USB-C cable
- Cable securing bracket
