Freewell Filter Set for OSMO Action 6 - Mega Kit - 12-piece set.

The Freewell 12-piece filter set for Osmo Action 6 is a complete solution for those who want full control over light in all conditions. Whether you're shooting in bright sunlight, at sunset, or at night in the city, this pack has a filter for every situation. With different types of filters, you can achieve smooth shots with natural movement, avoid light reflections, and improve the colors in your recordings.

ND, ND1000, and ND/PL filters - control light and special effects

ND filters (ND8, ND16, ND32, ND64) darken the image in bright conditions, allowing you to maintain the correct shutter speed – which translates into smoother motion and natural-looking blur. ND1000,

on the other hand, is a powerful ten-stop filter that allows you to extend the exposure time even in full sunlight – ideal for a "silky water" effect or cloud blur. ND/PL filters (ND8/PL, ND16/PL, ND32/PL, ND64/PL) combine light reduction with polarization – they reduce glare, e.g. from water surfaces, while improving contrast and color saturation.

Other filters – refine every frame

The CPL filter reduces reflections from glass and water and enhances colors, which works well, for example, when photographing landscapes or near water. Glow Mist 1/4 adds a soft glow to bright spots in the frame, giving the image a subtle, cinematic feel – without an exaggerated effect. The LPR (Light Pollution Reduction) filter reduces the impact of artificial light at night, improving the quality of urban shots after dark – especially when photographing or filming night panoramas.
