Freewell Filter Set for OSMO NANO - Mega Kit - 12 pcs.

The Freewell Mega Kit filter set for DJI Osmo Nano consists of 12 elements that allow you to record and photograph in almost any lighting conditions. The set includes ND, ND/PL, CPL, ND1000, Glow Mist, and LPR filters – each of which has a specific function that affects image quality. It is a practical solution for those who want to have full control over the light and the final effect of their shots.

ND, ND/PL, and ND1000 filters - daylight control and long exposure

ND filters (ND8, ND16, ND32, ND64) reduce the amount of light entering the lens, which helps maintain proper exposure on sunny days and achieve natural motion blur. ND/PL versions additionally reduce glare and improve contrast, making them ideal for use on the water or at the beach. The ND1000, on the other hand, is a filter for long exposures – it allows you to achieve a

smooth blur effect, e.g., on waterfalls or clouds, even in bright sunlight.

CPL, Glow Mist, and LPR - improved quality and creative effects

The CPL filter eliminates reflections from glass, water, and metallic surfaces, enhancing color saturation and contrast – ideal for urban and automotive photography. Glow Mist 1/4 adds a delicate, soft glow to bright spots in the frame, giving your footage a more cinematic, gentle feel. LPR (Light Pollution Reduction) filters out unwanted artificial light in nighttime city scenes, allowing you to capture cleaner and more vivid shots of the night sky or city skyline.

Included

- ND8 filter
- ND16 filter
- ND32 filter
- ND64 filter
- ND1000 filter
- CPL filter
- ND8/PL filter
- ND16/PL filter
- ND32/PL filter
- ND64/PL filter
- Glow Mist ¼ filter
- LPR filter
- 2x Case for four filters
