

Fanttik A10 Pro 2-in-1 laser distance meter

Model: A10 Pro 2-in-1

Manufacturer: FANTTIK

EAN: 782003141309

Product Code: 807834

R1,995

Fanttik A10 Pro 2-in-1 Laser Distance Meter

The Fanttik A10 Pro is a compact tool that combines a classic tape measure with a precise laser rangefinder. This allows you to measure both short distances with high accuracy and larger spaces without unrolling the tape. It is a convenient solution for home, workshop, and professional use—without the need to carry two separate tools.

Two measurement methods in one device

The A10 Pro combines a 3-meter tape measure with a laser rangefinder with a range of up to 50 meters. In practice, this means that you can quickly switch between traditional and laser measurement, depending on the situation. The tape measure is ideal for details and short distances, while the laser allows you to conveniently measure larger rooms or facades without the help of a second person. Intelligent mode switching makes it easy to work both indoors and outdoors.

Clear IPS screen - convenient work in all conditions

The meter is equipped with a 3.75 cm color IPS screen with adjustable brightness up to 500 nits and a resolution of 172 × 320. This ensures that readings remain clear even in direct sunlight.

Importantly, the screen simultaneously displays the results from the tape measure and laser rangefinder, which speeds up work and reduces the need to switch views. This saves time during intensive measurements.

Various units, modes, and reference points

The device supports 6 units of measurement: ft, ft+in, in, m, cm, and mm, making it easy to adapt to the type of project. There are 3 operating modes available – distance, area, and volume

measurement – so you can perform more calculations with a single device without additional tools.

Three reference points (front, rear, mounting hole) increase flexibility in hard-to-reach places such as corners or ceilings.

Measurement memory and USB-C charging

The Fanttik A10 Pro stores up to 30 measurement results, allowing you to quickly return to previous data without having to measure again. The built-in battery, charged via a USB-C port, provides over 5,000 uses on a single charge, making the device ideal for long working days without the need for frequent power connections.

Stability and operation in hard-to-reach places

The housing is designed for mounting on a tripod, which increases stability when measuring at height or in larger spaces. Stable positioning of the device translates into more accurate measurements and greater comfort when working in more demanding conditions. The Fanttik A10 Pro is a practical 2-in-1 tool for those who expect precision, convenience, and versatility in one compact device.
