Freewell Magnetic Filter Set for iPhone (3-Pack)

The Freewell magnetic filter set for iPhone is a practical solution for creators who want to take their mobile videos and photos to the next level. The set includes three filters: Snow Mist 1/4, a CPL filter that reduces glare and enhances color saturation, and a VND 1-5 filter that allows for precise exposure control. With these filters, you'll achieve more natural contrast, better image depth, and a professional look without needing advanced equipment.

Full control over light and detail

Each filter in the set serves a specific function, allowing you to adapt the image to lighting conditions and your intended style. The Snow Mist 1/4 subtly softens harsh light, reduces contrast, and creates a distinctive, cinematic atmosphere. The CPL filter eliminates reflections from surfaces such as water

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. or glass, while enhancing colors and improving detail clarity. The VND 1-5, on the other hand, allows for smooth adjustment of the amount of light reaching the lens, which translates to greater freedom when shooting in various conditions—from bright sunlight to changing lighting.

Quick installation and ease of use

The kit is designed for the Freewell Sherpa magnetic system, making filter installation quick, intuitive, and hassle-free. It takes just one click to securely mount the filter on a compatible Freewell iPhone Case & Cage. This solution significantly speeds up fieldwork and allows you to react instantly to changing lighting conditions without interrupting your recording.

Compatibility and Versatility

The filters are fully compatible with Freewell accessories, including the Genius Rig system and Sherpa magnetic solutions, ensuring broad compatibility and ease of use. You can easily install VND, CPL, and Mist filters as needed, creating a seamless and professional workflow. It’s the perfect choice for both videographers and photographers who demand maximum quality and control in a compact, portable form.
