TWS QCY Crossky R70 wireless headphones (gray)

The QCY Crossky R70 headphones are an advanced solution for those who value comfort, safety and excellent sound quality. Their open design makes them comfortable to wear for hours and keeps you in touch with your surroundings. They boast Hi-Res Audio certification and LDAC codec support, which translates into up to three times more detailed sound than standard Bluetooth headphones. Powerful 17 × 12 mm drivers guarantee dynamic, deep bass, while adaptive volume control and noise cancellation with dual microphones make phone calls clear and crisp. Then there's the impressive runtime - up to 52 hours with charging case - and personalization features available in the dedicated QCY app. The Crossky R70 is a headphone made for daily activities, work and relaxation.

Open design, comfortable to wear

Designed for maximum comfort, the QCY Crossky R70 headphones use Snag Fit technology and a 36° angle to perfectly fit the shape of each user's ear. Thanks to the use of shape memory alloy (Ni-Ti) and soft silicone, the headphones comfortably wrap around the ear cup without causing pressure while eliminating the risk of falling out. The open design does not completely isolate from the environment, making them safer for running, cycling or office work.

Hi-Res quality sound with triple magnets

The QCY R70s offer sound with unprecedented clarity among headphones with an open design. The 17 × 12 mm drivers with three magnets guarantee wide frequency response, and the use of the LDAC codec allows the audio signal to be transmitted at up to 990 kbps. That's up to three times more than the Bluetooth standard offers. The result? Powerful, juicy bass, clear vocals and rich detail - regardless of the music genre!

Automatically adjust volume to your environment

With Adaptive Volume Control, the QCY Crossky R70 headphones analyze ambient noise and automatically adjust the volume - quieter in the library, louder on a busy street. It's a convenient and safe solution that lets you enjoy your music without having to constantly reach for your phone.

Distortion-free conversations and a variety of modes

A set of two microphones and an advanced noise cancellation algorithm effectively captures your voice while eliminating wind and ambient noise - even when you're working out outside! In addition, a built-in list of relaxation sounds (e.g., wave noise, campfire, rain, birdsong) allows you to quickly switch to focus or mute mode, aiding relaxation and sleep.

Everyday reliability

The Crossky R70s provide up to 13 hours of playback on a single charge, and with the charging case, the total runtime reaches up to 52 hours. This is ideal for active people who don't want to worry about charging their headphones every day. The model also meets the IPX5 standard, which means sweat and splash resistance. You can easily enjoy your favorite music at the beach, by the pool or in the rain.

Full control and personalization in the QCY app

With the dedicated QCY app, you gain access to a host of useful features - from personalizing the touch buttons, to selecting the sound mode, to updating the software or locating the headphones. With the ability to connect to two devices simultaneously, you can easily take calls from your phone and listen to music from your laptop. Whether you're on the go, working or relaxing at home, the QCY Crossky R70s provide not only wearing comfort and great sound, but also features that make everyday life easier.
