

Avatto WT598-1T1 WiFi smart thermostat

Model: WT598-1T1

Manufacturer: AVATTO

EAN: 6976037361992

Product Code: 809386

R1,776

Avatto WT598-1T1 WiFi smart thermostat

The Avatto WT598-1T1 WiFi thermostat is a functional device that allows you to precisely manage the temperature in your home. Thanks to WiFi connectivity and cooperation with Smart Life, Tuya, Amazon Alexa and Google Home apps, you gain full control over heating - from anywhere, anytime. Simple operation, an easy-to-read screen and convenient functions make it an ideal choice. In addition, you can mount the thermostat in two ways - on your desk or attach it to the wall. This way you can easily adapt the device to the layout of the room and your own preferences.

Schedule programming - as you are comfortable with it

The thermostat supports 5+2, 6+1 and 7-day weekly modes. Each day you can set up to 6 different time slots with an assigned temperature, which allows you to perfectly match the heating operation to the daily rhythm of the household members - from morning to evening.

Precise temperature control

The device allows you to set the temperature with an accuracy of 0.5°C. The temperature range is between 5°C and 35°C, which gives great flexibility. The response threshold ranges from 0.5°C to 10°C and can also be adjusted. In addition, the temperature calibration function allows you to manually correct the measurements from -9.9°C to +9.9°C, which is especially useful if the thermostat is located in a place with specific conditions.

Easy-to-read display and energy-saving mode

The device features a display with a backlight that activates during operation. In standby mode, the screen automatically dims, which saves energy and does not interfere with comfort at night. Information remains visible, but not glaring.

Full control from the app

Thanks to integration with the Tuya, Smart Life and Avatto apps, you can remotely set the temperature, program an operating schedule or check current room conditions. The thermostat works with Wi-Fi and RF433 signal, which ensures stable communication even over longer distances.

Voice control

Avatto WT598-1T1 works with popular voice assistants: Amazon Alexa, Google Assistant and Yandex Alice. You can change the temperature or mode simply by speaking a command - without reaching for your phone or device.
