features an open-window detection function—when a window is detected as open, it automatically stops heating, helping to lower your bills.

Convenient operation

The thermostat is compatible with Apple HomeKit, Amazon Alexa, Hey Google, and SmartThings—so you can conveniently control it from your smartphone or via voice commands. All you need is a device running iOS 13.0 or later, or Android 6.0 or later. You don’t even have to get up from the couch to change the temperature, and you can create schedules to optimally tailor its operation to your family’s lifestyle.

Note

The thermostat works with popular underfloor heating systems and is not compatible with boilers or water heating systems.

Included

- Wi-Fi Smart Thermostat x1
- Sensor β=3950 R25°C=10K x1
