

RainPoint Hydroponic Growing Kit

Model: Z238

Manufacturer: RAINPOINT

EAN: 5905156102866

Product Code: 809941

R2,236

RainPoint Hydroponic Growing Kit

Enjoy fresh herbs and vegetables all year round. The RainPoint hydroponic growing kit allows you to grow up to 13 plants at once without using soil. The system features a 5-liter reservoir, a high-performance water pump with a flow rate of $150 \pm 10\%$ l/h, and LED lighting with automatic operating cycles. The device's dimensions vary depending on the configuration, ranging from 35 to 52 cm in length and 17 to 20.5 cm in width, making it easy to fit into any available space.

Faster growth thanks to hydroponics

The hydroponic system eliminates the need for soil, providing plants with exactly the amount of water they need. As a result, plants grow faster and more evenly. The water circulation system with a pump supports root aeration, which translates to healthier plant development.

Smart LED lighting for every growth phase

The built-in LED lamp offers two operating modes—one for vegetables and one for flowers and fruits. The automatic 16-hour on/8-hour off lighting cycle supports the natural growth rhythm of plants and replaces sunlight. The adjustable panel height (up to 36 cm) allows you to adapt the lighting to the plant's stage of development, preventing them from stretching or getting scorched.

Simple operation and automatic operation

The kit is designed to simplify cultivation as much as possible. The automatic pump operates in a 30-minute on/30-minute off cycle, ensuring optimal hydration and oxygenation of the roots. The control panel allows for quick startup of the device and selection of the appropriate lighting mode. Additionally, the device saves settings, so it returns to the last used operating mode when restarted.

Performance and thoughtful design

The kit is equipped with 13 planting baskets and special covers that limit light exposure to the water, helping to prevent algae growth. A practical water level window makes it easy to check the amount of liquid in the tank, and a dedicated refill opening allows you to conveniently add water without disassembling the entire system. The kit's housing is made of durable ABS plastic, which performs well in daily use and is moisture-resistant.

Ideal conditions for plants all year round

The unit works best at temperatures between 15°C and 30°C, providing a stable environment for plant growth regardless of the season. Thanks to controlled access to light and water, you can grow herbs, vegetables, or small fruits even in winter.

Included in the set:

- Hydroponic growing unit
- Power adapter
- Planting baskets x13
- Planting sponges x3

- Grow domes x13
- Labels x13
- Black covers x9
- Water inlet cap
- Spare water outlet cap
- Tweezers
- Light-blocking stickers x15

Manufacturer	RainPoint
Model	Z238
Power supply	100-240 V ~ 50/60 Hz
Operating voltage	12 V 2 A
Pump power	DC 12 V 0.08-0.1 A
Pump flow rate	150 ±10% L/h
Water tank capacity	5 L
Material	ABS
Weight	1.8 kg
Dimensions	35-52 × 17-20.5 cm

Height adjustment range Up to 36 cm

Operating temperature 15-30°C
