Fanttik X9 Pro Portable Compressor

The Fanttik X9 Pro is a compact, portable air compressor with a maximum working pressure of 150 PSI, designed to quickly inflate car, motorcycle, bicycle and ball tires. It stands out for its lightning-fast operation - it will inflate a passenger car tire in just 1 minute - and its advanced cooling system that allows for up to 23 minutes of continuous operation. The large LED (Light Emitting Diode, or light-emitting diode - a semiconductor element that emits light when an electric current flows through it) high-brightness display remains readable even in bright sunlight, making it easy to operate in the field.

Fast pumping

The device allows you to instantly inflate a car tire from 30 to 35 PSI in one minute. With a maximum pressure of 150 PSI, it will work well for a variety of applications - from cars and motorcycles to bicycles, balls, etc.

Integrated storage system

A special accessory compartment built into the housing prevents accessories from getting lost. The air hose is integrated into the body of the unit for easy access and storage.

Powerful battery and cooling

The built-in 7.4-volt (2.5 Ah) rechargeable battery provides a long run time, and the cooling system allows uninterrupted operation for 23 minutes without the risk of overheating. This ensures that the device is ready for action even with extended use.

Smart control

The X9 Pro offers 4 dedicated modes (car, motorcycle, bike, ball) and a manual mode. When the set pressure is reached, the device automatically shuts off, eliminating the need to constantly monitor the device's operation.

Simple and safe operation

The Smart On/Off system allows the compressor to be turned on by extending the yellow end of the hose and off by retracting it. In addition, the unit automatically shuts off after 3 minutes of inactivity, increasing safety and saving energy.

Included

- Fanttik X9 Pro compressor
- Hose
- Pump needle
- Presta valve adapter
- USB-A to USB-C cable
- User manual
