

Anycubic Photon Mono 4 Ultra 3D Printer

Model: PM4U-IP-O

Manufacturer: ANYCUBIC

EAN: 6974662351043

Product Code: 810371

R7,195

Anycubic Photon Mono 4 Ultra 3D Printer

The Anycubic Photon Mono 4 Ultra 3D printer is an advanced device designed for precision and performance in resin printing. Equipped with DLP technology, it offers unparalleled print quality and accuracy in a compact package. The Photon Mono 4 Ultra is ideal for both professionals and hobbyists who value reliability and versatility.

DLP technology - a new printing quality

At the heart of this printer is advanced DLP (Digital Light Processing) technology, which provides exceptional precision detail and even resin curing across the entire printing surface. Compared to traditional LCD screens, the DLP light source offers much higher accuracy, allowing to create detailed models with perfect geometry. This makes the device perfect for projects requiring maximum precision.

Durable light source

The Photon Mono 4 Ultra is equipped with a durable and energy-efficient DLP light source, which provides an exceptional lifespan - up to 20,000 hours of operation. This is a significant advantage over traditional LCD printers, which require more frequent replacement of light components. This not only makes the printer more economical, but also guarantees long-lasting and reliable operation.

Compact dimensions, impressive capabilities

Despite its compact size, the printer offers enough working space for a variety of projects - from precision prototypes to jewelry to artistic models. Its compact design means it will find a place in any workshop or studio without taking up too much space, while still providing high-quality prints.

Intuitive operation and compatibility

The printer has been designed for users for whom convenience and ease of use are important. The intuitive interface and easy-to-read touchscreen allow easy configuration of settings, while compatibility with a wide range of software makes working with the Photon Mono 4 Ultra smooth and hassle-free. In addition, the device supports a variety of resin types, giving users greater flexibility in their projects.

Energy efficient and eco-friendly

DLP technology not only provides exceptional print quality, but also reduces energy consumption. Thanks to its optimized lighting system, the Photon Mono 4 Ultra is more environmentally friendly, while reducing operating costs. It is an ideal choice for those who value modern environmental solutions.

Versatile application

Photon Mono 4 Ultra will be perfect for many fields such as medicine, engineering, design and art. The printer allows the realization of diverse projects - from functional prototypes to conceptual models to highly aesthetic details. Its capabilities open up new perspectives for both professionals and those developing their passions in the world of 3D printing.

Robust design and reliability

The device is made of high-quality materials, which guarantees durability and stable operation. Precise execution of each component makes the printer work flawlessly even with intensive use. Photon Mono 4 Ultra is equipment you can rely on in any situation.

Included

- Photon Mono 4 Ultra
- Printing platform
- Resin vat
- User manual
- Screen protector kit
- Leveling paper
- Gloves
- Funnels
- Scrapers
- Hex key set
- USB drive
- Power cord

Manufacturer	Ancubic
Model	PM4U-IP-O
Working area	153.4 mm*87 mm*165 mm
Dimensions	231mm*236mm*430mm
Printing speed	Standard resin with 0.1mm layer height: 80mm / h peak speed; High speed resin with 0.1mm layer height: 120 mm / h peak speed
Machine leveling	4-point manual leveling
LCD screen size	7-inch 10K monochrome LCD display
Light source	COB light source + Fresnel lens + light uniformity algorithm
Xy resolution	17*17µm

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Operating screen	4.3" TFT touch screen
Cutting software	Photon Workshop
Material	Supports most resins available on the market (water-washable, standard, bio-resins, plant-based, etc.).
File transfer	USB & WiFi & LAN MODE (Q4)
Weight of the device	5 KG
Light uniformity	≥90%
Release film	ACF
Light intensity	≥3500μW /cm ²
Layer height	0.02-0.15 mm
Package dimensions	512mm*300mm*305mm
Air purifier	USB
Anycubic application	Supported
Intelligent printing system	Supported
