

Peladn S-2 Oculink Docking Station

Model: S-2

Manufacturer: PELADN

EAN: 6972410027264

Product Code: 810615

R3,067

Peladn S-2 Oculink Docking Station

Turn your lightweight laptop into a powerful gaming or creative workstation with the PELADN Link S-2 eGPU docking station. This model uses the Oculink interface, which allows you to connect an external graphics card and significantly boost your computer's graphics performance. The built-in signal booster ensures a stable connection and high data transfer rates, while the open design provides effective cooling for the components. Thanks to compatibility with standard ATX and SFX power supplies and support for a wide range of graphics cards, users can configure a setup tailored to their own needs.

Complete configuration freedom

The PELADN Link S-2 allows for the free combination of graphics cards and power supplies without power limitations. The design supports most graphics cards available on the market, with the recommended minimum being the AMD RX570 or NVIDIA GTX1060 models. The station is also fully

compatible with NVIDIA RTX 40 and AMD RX 7000 series graphics cards. For NVIDIA RTX 40 series cards, it is recommended to use a power supply compliant with the ATX 3.0 standard to fully utilize their capabilities.

Open design for better cooling

The minimalist, open design not only facilitates component installation but also improves heat dissipation. Unlike traditional enclosed eGPU enclosures, which often restrict airflow and generate higher noise levels, the Link S-2 ensures free air circulation around the graphics card. This allows components to operate efficiently even under prolonged load.

Convenient everyday use

The dock is equipped with a linked power switch that synchronizes its operation with the main power supply. When the computer is turned on, the station starts automatically, eliminating the need to manually turn on additional devices. This solution enhances user convenience and helps reduce unnecessary energy consumption.

Ideal for gaming and creative work

Thanks to its support for high-performance graphics cards, the dock is perfect for playing demanding AAA games, working with graphics, designing, and editing video content. It's a practical solution for people who want to use a mobile laptop on a daily basis and quickly boost its computing power upon returning to the office or home without having to invest in a large gaming laptop.

Manufacturer	PELADN
Model	Link S-2
Interface	OCulink
Power Supply	ATX / SFX
Compatibility	
Dimensions	253 × 162 × 41 mm

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Supported Graphics Cards	Most available graphics card models (we recommend using AMD RX 570 series graphics cards or newer, and NVIDIA GTX 1060 series graphics cards or newer)
System Requirements	Windows 10 (64-bit version) (supports both AMD and NVIDIA graphics cards), macOS 10.13.4 or later (supports AMD graphics cards only)
Hardware requirements	OCulink port with eGPU support
