Joystick PXN-2119 Pro

Take the controls and feel like the pilot of a real airplane. The PXN-2119 Pro kit consists of a joystick and a separate throttle lever. Thus, it can provide an even higher level of realism! Reduced reaction time, smooth operation and unmatched precision are just some of the advantages of these devices. There is also an 8-way Hat Switch, up to 16 programmable buttons and a Rapid-Fire trigger. Also noteworthy is the wide compatibility and ergonomic design. You can also use the joystick independently.

Made for gamers

Both the joystick and the throttle feel great in the hands and provide a fantastic control experience. As many as 16 programmable buttons will allow you to customize the hardware according to your habits, and you can also prepare for yourself 3 setting modes optimized for different games, for example. In addition, the joystick offers an 8-way Hat Switch, which will allow you to quickly change

your point of view. It can also be conveniently used separately - without connecting the throttle.

Realistic experience

Feel like you're in a real airplane. The PXN-2119 Pro joystick fantastically replicates the functionality of its real-world counterparts. Both included devices have built-in vibration motors that will give you more immersion during any virtual flight. What's more, a separate throttle allows you to enjoy a more realistic experience. The joystick is also equipped with a Rapid-Fire trigger, so you can easily fire plenty of accurate bullets at your opponents.

Comfortable gameplay

Get even more fun and satisfaction from your gameplay. Thanks to its ergonomic design, the PXN-2119 Pro joystick fits fantastically to the shape of your hand and provides dreamlike comfort, even when you use it for a long time. Don't worry that wrist pain and fatigue will thwart your plans during the next duel! In addition, a special suction cup makes the device stand stably on the desk and does not move on its surface.

Wide compatibility

Do you like to play War Thunder or World of Warplanes? Or do you prefer Microsoft Flight Simulator? The PXN-2119 Pro joystick works perfectly with most popular aviation and war games! What's more, the product is compatible with computers running on Windows 7 / 8 / 10 / 11, as well as Xbox One and PlayStation 4 consoles. Connect it to the device of your choice and take your gaming experience to a new level!
