

QCY SP300 Wireless Speaker (Black)

Model: SP300 black

Manufacturer: QCY

EAN: 6957141410899

Product Code: 810639

R2,791

QCY SP300 Wireless Speaker (Black)

Music can completely transform the atmosphere of a room, and the right equipment enhances that experience. The QCY SP300 wireless speaker makes every track sound fuller, clearer, and more spacious. Its carefully designed acoustic structure with four drivers generates a powerful, dynamic sound that effortlessly fills the entire room. Bluetooth 6.0 connectivity, support for Hi-Res Audio and LDAC codecs, and the ability to customize the sound in the app allow you to tailor the music to your preferences. The elegant finish and subtle ambient lighting also make the device a stylish design element. Add to that long battery life, IPX6 splash resistance, and multiple ways to play music—from Bluetooth to memory card or AUX cable.

Multi-driver design and powerful 40 W output

The secret to its impressive sound lies in the speaker's advanced acoustic design. Inside, four drivers work in tandem: a 1-inch silk dome tweeter responsible for high frequencies, a 3.5-inch wool fiber

woofer generating deep bass, and passive radiators supporting low frequencies. This design clearly separates the high and low frequency ranges, giving the sound greater depth and naturalness. Every instrument and vocal remains clear even at high volumes. The speaker offers 40 W of continuous power and can reach up to 80 W at peak, allowing it to easily fill larger rooms with sound. The sound remains loud, dynamic, and crystal-clear, even when you turn up the volume.

Advanced DSP Processing and Hi-Res Audio

Modern DSP chips ensure sound precision by analyzing and optimizing the audio signal in real time. As a result, the music retains excellent tonal balance and rich detail, and every track sounds more authentic. The speaker supports Hi-Res Audio, Hi-Res Audio Wireless, and the LDAC codec, which allows for the transmission of significantly more audio data than traditional Bluetooth audio. In practice, this means up to three times more detail and more clearly audible nuances in the recording. Subtle elements of vocals, instruments, and sound effects become clearer, and the entire musical scene gains depth and spaciousness.

Sound Customization

The ability to adjust the sound profile allows the speaker to adapt to your individual preferences. The mobile app features a full-range equalizer that lets you adjust specific frequency bands. With just a few swipes, you can boost the bass, highlight vocals, or achieve a more neutral sound. If you want an even more spacious sound, you can pair two speakers in True Wireless Stereo mode. The TWS feature creates a stereo system with a clear division between the left and right channels, which significantly widens the soundstage and provides a more immersive experience when listening to music or watching movies.

Multiple playback options and a stable connection

The QCY SP300 offers great playback flexibility thanks to support for Bluetooth 6.0, TF memory cards, an AUX input, and a USB-C port, while the stable connection minimizes latency and interference. The Dual Devices Connection feature allows you to pair two devices simultaneously and switch between them seamlessly. The built-in battery provides up to 14 hours of runtime, allowing you to use the speaker all day long, regardless of the conditions—both at home and outdoors, even when exposed to water.

Included

- wireless speaker
- power adapter
- USB-C audio cable
- 3.5 mm audio cable
- user manual

Manufacturer	QCY
Model	SP300
Color	Black
Profiles	A2DP 1.4 \ AVCTP 1.4 \ AVDTP 1.3 \ AVRCP 1.6.2 \ HFP 1.8 \ SPP 1.2 \ RFCOMM 1.2 \ PNP 1.3 \ HID 1.1.1 \ SDP core 5.4 \ L2CAP core 5.4
Bluetooth version	6.0
Wireless range	10 m
Compatible operating systems	iOS, Android
Output power	10W (high frequencies) + 30W (midrange)
Battery life	14 hours with lighting off, 10 hours with lighting on
Battery capacity	7800 mAh
Dimensions	243 x 148.8 x 138 mm
Connectivity	Bluetooth, TF card, AUX, USB-C
Water resistance	IPX6
