ZEUSLAP Z22P PRO Portable Monitor with a 22" Touchscreen

The ZEUSLAP Z22P PRO portable monitor features a 22-inch touchscreen with a resolution of 2560×1440 (2.5K QHD) and a 16:9 aspect ratio, offering high image detail (190 PPI) and comfortable viewing in various conditions thanks to a brightness of 400 cd/m² and a contrast ratio of 1000:1. Equipped with a TFT-LCD panel featuring an anti-glare coating, it delivers 16.7 million colors and 100% sRGB coverage, resulting in natural color reproduction. Touch support and a stylus with 4096 pressure levels expand creative possibilities, while broad compatibility (USB-C, mini HDMI) allows you to connect a laptop, phone, or console. The slim, metal design with an adjustable stand and VESA 75×75 mm support makes the monitor ideal for both desktop use and on the go.

Clear image even in bright environments

With a brightness of 400 cd/m², the screen remains clearly visible even in brightly lit rooms, which is important when working during the day or under artificial lighting. A 1000:1 contrast ratio ensures clear distinctions between light and dark elements, making the image easier to read and less straining on the eyes. The high 2.5K resolution further enhances detail sharpness, making it easier to work with text and graphics. The matte finish reduces glare, so the screen doesn't distract you even during extended use.

Touch and stylus - precise work without limits

The touchscreen, combined with a stylus supporting 4096 pressure levels, gives you greater control over every movement. This allows you to comfortably draw, sign documents, or take notes directly on the screen. The stylus offers a battery life of over 130 hours, reducing the need for frequent charging and allowing you to focus on your tasks. Charging via USB-C simplifies the entire process and eliminates the need for additional accessories.

Versatile use and easy connection

The monitor works with a wide range of devices—from laptops and smartphones to gaming consoles. Thanks to USB-C and mini HDMI ports, setup is quick and requires no complicated configuration. Support for extended and mirrored display modes lets you adapt your workflow to your current needs. The ability to use your phone in desktop mode allows the monitor to serve as a mobile workstation.

Design tailored to a mobile work style

The slim chassis and weight of approximately 2.45 kg make it easy to transport the monitor between home, the office, and while traveling. The adjustable stand with a range of up to 180 degrees allows you to comfortably position the screen at the right angle. Support for portrait and landscape modes increases flexibility when working with different types of content. The metal construction improves durability, which is essential for frequent use in various locations.

For work, study, and entertainment

The Z22P PRO works well as a secondary screen for office work, expanding your workspace and making it easier to organize tasks. For creative applications, it allows for convenient design and editing of graphic materials thanks to touch and stylus support. For entertainment, it offers standard 60 Hz smoothness, suitable for everyday use, watching movies, or playing console games without a focus on high refresh rates. Built-in speakers and broad compatibility allow the monitor to serve as a universal multimedia center.
