ZEUSLAP P16 Ultra 16" 144Hz Portable Monitor

The ZEUSLAP P16 Ultra portable monitor is a versatile solution for those who need an extra screen for work, travel, and entertainment. It features a 16-inch panel with a resolution of 1920×1200 (WUXGA) and a 16:10 aspect ratio, providing more workspace than standard screens. The high 144 Hz refresh rate ensures smooth visuals, while the 350-nit brightness improves readability in various conditions. The monitor uses Oxide TFT-LCD technology, which supports stable performance and energy efficiency. With USB-C and mini HDMI ports, it works with laptops, smartphones, PCs, and consoles, including the Nintendo Switch, and its light weight of 692 g makes it easy to carry around daily.

More space and a more comfortable work experience

The 16-inch screen with a 16:10 aspect ratio provides noticeably more vertical space than the classic 16:9 format. In practice, this means more comfortable work with documents, spreadsheets, or a web browser, as more content fits on a single screen without constant scrolling. The 1920×1200 resolution ensures sharp text and interface elements, which translates to everyday comfort. This format works well for office work, studying, and using online applications.

144 Hz Smoothness

A 144 Hz refresh rate makes the image noticeably smoother than on standard 60 Hz monitors. The difference is noticeable while gaming, but also when simply scrolling through web pages or working with dynamic applications. This makes motion feel more natural, and details remain clear even during rapid changes on the screen. As a result, using the monitor is simply more enjoyable and less straining on the eyes.

Bright Screen and Everyday Color Quality

The 350-nit brightness allows for comfortable work both indoors and in brighter environments. Wide 178° viewing angles ensure the image remains clear regardless of the user's position. 66% sRGB coverage provides basic color reproduction that works well for everyday use. This makes it ideal for office work, watching content, and browsing the web.

Universal compatibility and easy connection

The monitor is equipped with two USB-C ports and a mini HDMI port, offering great flexibility for connecting to various devices. You can use it as a second screen for your laptop, extend the display from your smartphone, or connect a console, such as the Nintendo Switch. For devices that support video and power delivery via USB-C, operation is possible using a single cable, which simplifies the setup and reduces the number of cables. Support for 5V 3A power delivery ensures stable monitor operation in various configurations.

Portability and lightweight design

Weighing approximately 692 g, the device is easy to take on the go or for mobile work. The slim design, approximately 10 mm thick, allows the monitor to fit easily in a bag alongside a laptop. This

lets you expand your workspace virtually anywhere without needing large, desktop monitors. It's a convenient solution for people who frequently change their work location.

Additional features and details

The monitor is equipped with built-in 2 × 1 W stereo speakers, which are suitable for basic audio playback. There is also a 3.5 mm audio jack, allowing you to connect headphones or external speakers. Intuitive dial controls make it easy to quickly adjust settings such as brightness and volume. Additionally, the monitor supports 75 × 75 mm VESA mounting, allowing for installation on a mount or desk arm.
