ZEUSLAP Z23 LITE 23" Portable Monitor

The ZEUSLAP Z23 LITE 23.8" portable monitor features a large Full HD (1920×1080) screen with a 100 Hz refresh rate, 300 nits of brightness, and 100% sRGB coverage. The 16:9 aspect ratio and 1000:1 contrast ratio translate to a clear, balanced image for everyday use. The model is equipped with USB-C and mini HDMI ports, allowing you to easily connect a laptop, computer, console, or phone. This is the solution for those who need an additional screen for work or entertainment but are aware of its larger, less compact form factor.

A large screen for work and entertainment

The 23.8-inch diagonal significantly increases your workspace compared to typical, smaller portable monitors. This makes it more comfortable to work with multiple windows simultaneously, analyze data, or create content without constantly switching views. The larger screen also works well for watching movies and gaming, as it provides a more comfortable viewing experience.

100 Hz Smoothness

A 100 Hz refresh rate delivers noticeably smoother visuals than the standard 60 Hz. In practice, this means smoother page scrolling, less motion blur, and better visibility of dynamic scenes. This matters both during daily work and when watching videos or gaming. As a result, the screen keeps up better with faster motion, which improves the overall user experience.

Natural colors and good detail

Full HD resolution combined with 100% sRGB coverage delivers a clear and consistent image. Colors are natural, making it easier to work with graphics, photos, or video content. A 1000:1 contrast ratio helps maintain detail clarity in both brighter and darker scenes. This makes the monitor well-suited for everyday multimedia and office use.

300 nits of brightness for everyday use

A brightness level of 300 nits works well in office and home environments. The image remains clear under standard lighting, allowing you to work comfortably for extended periods. In very bright environments, especially in direct sunlight, the screen's performance may be limited. In such conditions, it is better to use the monitor in a location with controlled lighting.

Versatile connectivity with various devices

The presence of USB-C and mini HDMI ports enhances compatibility with a wide range of devices. The monitor can be connected to a laptop, desktop computer, smartphone, or gaming console without complicated setup. This allows you to quickly expand your workspace or transfer gameplay to a larger screen. This solution offers greater flexibility in everyday use.

Slim design and mounting options

With a bezel approximately 6.8 mm thick at its thinnest point, the monitor has a modern look and takes up less space on your desk. This design also makes it easier to store, despite the larger size of the entire unit. Additionally, support for the VESA 75 × 75 mm standard allows you to mount the screen on a stand or arm. This lets you better adjust the monitor's position to your workspace.

Everyday Features

The monitor is equipped with built-in speakers and a 3.5 mm audio jack, allowing you to enjoy sound without additional accessories or to connect your own headphones. The housing also features buttons to control settings such as brightness and volume. This lets you quickly adjust the display settings to your current environment. All in all, it creates a functional tool for work and entertainment without unnecessary complications.

Included

- ZEUSLAP Z23 LITE Monitor
- USB-C to USB-C cable
- Mini HDMI to HDMI cable
- USB to USB-C cable
- User manual
