ZEUSLAP Z16H 16" Portable Monitor

The ZEUSLAP Z16H 16" portable monitor is a compact, secondary display with a resolution of 2560 × 1600 (2.5K), featuring IPS technology, a 16:10 aspect ratio, and a brightness of 400 nits. It offers broad compatibility with laptops, smartphones, and gaming consoles (PS4, PS5, Xbox, Nintendo Switch), and thanks to its USB-C and HDMI ports, it can be easily connected to various devices. 115% sRGB coverage and a 1200:1 contrast ratio result in a clear and detailed image. The slim design (approx. 8.5 mm) and light weight (~900 g) make the monitor ideal for mobile work, and the included cable set and power adapter let you start using it right away.

Clear images for work and entertainment

The 2.5K resolution combined with a 16-inch IPS panel delivers a sharp and clear image, making it easier to work with documents, graphics, or code. The 16:10 aspect ratio provides more vertical workspace, so you scroll less and see more information faster. The 400-nit brightness allows for

comfortable use of the monitor even in well-lit rooms. Wide viewing angles ensure the image remains clear even when viewed from the side.

Colors and Details in Everyday Use

115% sRGB coverage and support for 1.06 billion colors (8-bit + Hi-FRC) make the image more natural and pleasing to the eye. This makes photos, videos, and graphic designs look more realistic. A 1200:1 contrast ratio improves the visibility of details in darker scenes. As a result, the monitor works well both for work and for watching multimedia.

Tilt function and Flip mode

The screen can be physically tilted 180°, allowing you to position it facing away from the laptop, e.g., during a presentation. Additionally, the electronic image rotation (Flip) feature allows for convenient viewing of content by a person sitting across from you without changing the device's orientation. This solution facilitates collaboration and meetings. In practice, this means greater flexibility in various work scenarios.

Portability and durable construction

The slim chassis and weight of less than 1 kg make the monitor easy to take with you to work, to school, or on a trip. The metal construction increases durability and stability during use. The compact dimensions allow you to easily fit the device in a bag along with your laptop. This is the solution for people who need an extra screen always at hand.

Audio and multimedia use

Built-in stereo speakers (2 × 1 W) allow you to use the monitor without needing to connect additional audio equipment. This is a convenient solution when watching movies or playing on a console. The sound quality is sufficient for everyday use and presentations. An audio output is also available if needed.

Key specs for gamers

A 3 ms response time (Tr+Td) minimizes motion blur, which is crucial during fast-paced gaming scenes. The 60 Hz refresh rate ensures a stable and smooth image during standard use. This makes the monitor a great choice as an additional screen for a gaming console or laptop. It strikes a balance between portability and gaming comfort.

Power and connectivity

The monitor can be connected via USB-C or HDMI, offering great flexibility in setup. Depending on the device, it can be powered directly via USB-C, but for full performance, a 12V / 2.5A power supply is recommended (power adapter included). This ensures stable operation regardless of the scenario. A wide range of ports makes it easy to connect quickly and get started.

Included

- ZEUSLAP Z16H 16" Monitor
- Power adapter
- USB-C to USB-C cable ×2
- Mini HDMI cable
- User manual

Manufacturer	ZEUSLAP
Model	Z16H
