Manufacturer: ZEUSLAP

EAN: 6974065451890

Product Code: 810840

R5,681

ZEUSLAP OL133ED Portable Monitor with a 13.3" Touchscreen

The ZEUSLAP OL133ED 13.3" portable monitor is a compact OLED display with Full HD 1920×1080 resolution, 10-point touch support, and broad compatibility thanks to USB-C and mini HDMI ports. It offers a very high contrast ratio of 100,000:1, 400 nits of brightness, and full coverage of the 100% sRGB and DCI-P3 color spaces, resulting in a clear and vibrant image. Its slim design, just 6.8 mm thick and weighing approximately 560 g, makes the monitor easy to take with you, while the 1 ms response time and built-in stereo speakers further enhance its versatility—for both work and entertainment. As a result, a single device can replace a traditional monitor in many everyday applications.

OLED Display - Depth and Detail

The use of an OLED panel allows the monitor to deliver very deep blacks and high contrast, which directly translates to a more realistic image. Colors are intense but not exaggerated, making the screen ideal for watching movies as well as working with graphics or documents. Additionally, wide viewing angles ensure the image remains clear regardless of the user's position.

Touchscreen - convenient operation

The screen supports 10 touch points, so you can use it just like a tablet. This speeds up work during presentations, content browsing, or app use. The touch response is smooth, which is especially important for mobile work, where responsiveness and intuitive operation matter.

Mobility without compromise

Its light weight and slim profile mean the monitor fits easily into a laptop bag. This allows you to expand your workspace virtually anywhere—in the office, on the go, or at home. The lightweight design also means greater comfort in daily use and less strain during transport.

Wide compatibility

The monitor works with laptops, smartphones, and consoles thanks to its USB-C and mini HDMI ports. You can connect devices such as the Nintendo Switch, PlayStation, or Xbox to it, as well as use DeX mode or similar mobile solutions. This allows a single device to serve multiple purposes and reduces the need for additional equipment.

Smoothness and comfort of use

A 1ms response time minimizes motion blur, which is noticeable during dynamic scenes in games or movies. The 60Hz refresh rate ensures a stable image, and the 400-nit brightness allows for comfortable use of the monitor even in brighter rooms. In practice, this means a more comfortable viewing experience without the need to constantly adjust settings.

Additional features and audio

Built-in stereo speakers allow for quick multimedia use without the need to connect additional equipment. The monitor also features VESA compatibility, enabling wall mounting, and the touch menu facilitates quick management of settings. This makes setup and daily use simple even for less advanced users.

Included

- ZEUSLAP OL133ED monitor
- USB-C to USB-C cable x 2
- Mini HDMI cable
- USB to USB-C cable
- User manual
