

# **SONOFF ZigBee SNZB-02D Temperature and Humidity Sensor, 4-pack**

Model: SNZB-02D 4Pack

Manufacturer: SONOFF

EAN: 6979033600478

Product Code: 811009

## **R1,995**

### **SONOFF ZigBee SNZB-02D Temperature and Humidity Sensor 4-Pack**

Monitor temperature and humidity in different rooms. The Sonoff sensor provides precise readings that update every 5 seconds. It also allows you to remotely monitor temperature in real time and sends notifications in the app when the set temperature is exceeded. In addition, it stores data in the cloud, giving you convenient access to the measurements.

### **Various Applications**

The Sonoff sensor is ideal for rooms with an area of up to 120 m. The product is suitable for use in places such as terrariums, wine cellars, music stores, incubators, greenhouses, etc. You can also use it at home, for example, in a child's room.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

## High Accuracy

The device is equipped with a Swiss hygrometer that measures temperature and humidity with an accuracy of  $\pm 0.2^{\circ}\text{C}/\text{RH}$ . Additionally, readings are updated every 5 seconds, so you can stay constantly informed. You can also switch the temperature units between  $^{\circ}\text{C}$  and  $^{\circ}\text{F}$ .

## Convenient operation

The sensor is controlled via the app. This allows you to easily view notifications, such as when the temperature exceeds a set limit. What's more, you can add the device to Home Assistant via eWeLink or use it alongside other smart home devices—when the humidity level drops below 40%, the humidifier will turn on automatically. The Sonoff SNZB-02D also supports Amazon Alexa and Google Home, so a simple voice command is all it takes to check the temperature or humidity in a given room.

## Wide Compatibility

You can connect the Sonoff SNZB-02D to a variety of devices. The sensor supports Zigbee gateways that use the 3.0 protocol. As a result, it's compatible with the NSPanel Pro wall switch, the Sonoff Zigbee Bridge/Pro smart hub, the Sonoff ZBDongle-P/E dongle, and the Amazon Alexa system with a built-in Zigbee hub.

## Convenient Access to Data

Do you want to store your recorded measurements? With the Sonoff SNZB-02D, you can easily access them. The eWeLink app allows you to save readings, so you can check measurement results for a specific hour or day at any time and then export them. Additionally, the measurement history is available for six months. To access this history, you'll need a Sonoff gateway in addition to the app.

## 3 Mounting Options

You can mount the sensor in 3 different ways, so you can choose the one that works best for you. Thanks to the built-in stand, you can place the device on a desk or countertop for quick access to your readings. The magnetic design also allows you to attach the SNZB-02D to a metal surface, such
