VIAIM Recdot 2 AI TWS Earbuds (Black)

Whether for work, travel, business meetings, or just listening to music every day—the VIAIM Recdot 2 were designed with exactly these scenarios in mind. They combine high-quality Hi-Res Audio Wireless sound with active noise cancellation up to 48 dB, advanced AI features, and the ability to record, transcribe, and translate notes, as well as automatically summarize conversations. With up to 36 hours of battery life, a lightweight design, IP55 water and dust resistance, and convenient control via a dedicated app, they're perfect for both work and everyday use.

Your Personal AI Assistant

VIAIM Recdot 2 offers much more than just music playback. The earbuds can record conversations, create transcripts, translate the generated notes, and automatically prepare clear summaries of the

most important information. The AI analyzes the course of meetings, generates titles, summaries, and mind maps, making it much easier to quickly find the most important points. The AI Deep Search feature is also available, allowing you to instantly search for specific information stored in recordings. What's more, you can customize the intelligent summaries to the specifics of your industry, ensuring that the generated reports better align with the nature of your work.

Record, save, and manage every conversation

The headset features several recording modes suitable for a variety of uses—from phone calls and online and offline meetings to lectures, as well as audio and video content. The FlashRecord feature lets you start recording immediately after pressing a button on the headset, without having to reach for your phone. Thanks to independent recording technology, files are saved directly to the headset, and you can then conveniently play them back, transcribe them, or translate them in the app. The system supports a variety of recording environments and automatically converts recorded material into text, making it easier to organize and review later.

Unrestricted Communication

VIAIM Recdot 2 effectively eliminates language barriers by supporting as many as 78 languages and 145 dialects. Conversations can be transcribed and shared with others, which significantly simplifies international meetings. The translation feature for generated notes is also useful during lectures, training sessions, or courses abroad, allowing you to conveniently refer back to both the original recording and the finished translation.

High-Quality Sound

Hi-Res Audio certification and support for the LHDC codec ensure detailed, rich sound with a wide frequency range. The headphones reproduce low frequencies starting at 20 Hz and high frequencies up to 48 kHz, making the music delightfully natural and rich in detail. Active Noise Cancellation (ANC) with up to 48 dB of effectiveness ensures a comfortable listening experience. An intelligent AI algorithm analyzes ambient sounds and automatically adjusts the noise-cancellation level to current conditions, allowing you to better focus on your music, work, or conversation even in noisy environments.

Clear Calls in Any Environment

Each earbud is equipped with three microphones and an additional bone-conduction microphone. This combination allows for more effective voice capture and reduces the impact of ambient noise. An advanced noise-reduction algorithm during calls amplifies speech and minimizes background noise, ensuring that conversations remain clear even on crowded streets, at train stations, or in open-plan offices.

All-Day Comfort

The minimalist, elegant design fits perfectly into both business settings and everyday use. Each earbud weighs just 4.8 g, making it almost imperceptible even when worn for hours on end. The set includes silicone ear tips in four sizes (XS, S, M, and L), making it easy to find a comfortable fit for different ear shapes. Size M is pre-installed. The IP55 rating provides protection against dust, sweat, and splashes, making the earbuds ideal for workouts and outdoor activities.

Long Battery Life and Convenient Use

On a single charge, the earbuds can last up to 9 hours, and with the charging case, the total runtime reaches up to 36 hours. The case supports wireless charging, so all you need to do is place it on a compatible inductive charger to enjoy cable-free charging. Bluetooth 5.2 ensures a stable connection to your devices, and the dual-device pairing feature lets you conveniently switch between your smartphone and laptop. The VIAIM app, available for Android and iOS, offers additional features. It lets you manage recordings, transcriptions, and translations of generated notes; adjust the noise-cancellation level; check the fit of the earbuds; configure sound effects and button functions, manage connected devices, use voice recognition, locate the earbuds, and store files in the cloud.

Included

- earbuds
- charging case
- charging cable
- earbud tips (XS, S, M, L) x4
- user manual
