VIAIM NoteKit AI Recording Dongle (Gray)

Meetings, lectures, training sessions, or conversations with clients no longer have to mean frantically taking notes and worrying that something will slip your mind. VIAIM NoteKit records audio directly to your computer, automatically transcribes it into text, creates summaries, and highlights the most important tasks to complete. It works with the most popular online meeting apps, supports multiple languages, and thanks to its compact design, you can always have it at your fingertips. Just plug the device into your computer and get started—quickly, conveniently, and without any unnecessary setup.

Record meetings and create transcripts instantly

VIAIM NoteKit is designed to work with computers running Windows or macOS. The device allows you to record both in-person and online meetings, then automatically converts speech into readable text. Its compatibility with the most popular video conferencing platforms makes it ideal for business

meetings, remote classes, webinars, and presentations. This allows you to focus on the conversation while letting NoteKit's smart features handle the documentation.

Time-Saving AI Features

Recording alone is just the beginning of what this device can do. Built-in AI features analyze the conversation transcript, automatically generate concise summaries, and highlight the most important decisions and action items. NoteKit supports transcription and translation in 78 languages and 145 accents, making it easier to collaborate with international teams and use foreign-language materials more conveniently. The device can also display subtitles for foreign-language videos, enhancing the viewing experience and making it easier to understand the content.

Clear Recordings and Complete Freedom of Work

Built-in microphones capture sound from up to 5 meters away, ensuring clear recordings of conversations in conference rooms, offices, or during team meetings. Starting and ending a session is done with a single button, making operation quick and intuitive. For added convenience, you can pair the device with VIAIM Earbuds, creating an even more functional setup for work and communication.

Ready to use right after connecting

Forget about complicated setup and installing additional accessories. VIAIM NoteKit operates in Plug & Play mode—simply connect it to your computer to start recording almost immediately. All recorded content is synced across devices logged into the same account, so you can conveniently access it no matter which device you're currently using. It's a practical solution for people who work in the office, at home, and on the go.

Designed for everyday use

With a compact body just 6 cm long, the VIAIM NoteKit easily fits in a pocket, laptop case, or bag. The magnetic cover makes it easy to store the device and protects the integrated, reversible connector from damage. The package is rounded out by an eye-catching ring-shaped LED indicator that shows the device's operating status and a Bluetooth 5.3 module that ensures stable
