Arzopa A3C Pro 13.3" Portable Monitor

The Arzopa A3C Pro is a portable monitor that combines great image quality with maximum functionality. With its OLED matrix, it provides vivid colors, excellent contrast and fast response time, making it ideal for gamers, content creators and those who need an additional screen for mobile work. Its compact design, light weight and versatility allow you to take it anywhere - to the office, a coffee shop or on a trip. The ability to change the screen's orientation from landscape to portrait makes it easy to adapt the monitor to your current needs, increasing comfort and productivity.

Extremely fast response and smooth images

The Arzopa A3C Pro monitor features a response time of 1 ms, which guarantees smooth display of dynamic content. Compared to traditional IPS matrices, which have a response time of up to 30 ms, the OLED matrix eliminates ghosting and lag. As a result, the image is extremely clear and every

action on the screen is presented in real time, improving the visual experience and enhancing precision during gaming.

Vivid colors and perfect contrast

The OLED matrix in the Arzopa A3C Pro monitor provides 8-bit color depth and realistic image reproduction. High brightness of 400 nits and infinite contrast allow you to enjoy perfect visibility even in bright rooms. In addition, 100% coverage of the DCI-P3 color space and HDR10 support make images full of detail and colors vibrant and natural. This is a great option for graphic designers, photographers and anyone who appreciates image quality at the highest level. With such a wide color palette, the monitor perfectly reproduces both bright and dark scenes.

Versatile screen orientation

Another of the biggest advantages of the Arzop A3C Pro is the ability to change the screen orientation from horizontal to vertical. This allows the monitor to adapt to different usage scenarios. Vertical mode is particularly useful when working with documents, programming, or browsing the web, as it provides a larger work surface. Horizontal mode, on the other hand, is ideal for watching movies, gaming or editing multimedia. Changing the orientation is instantaneous, allowing you to easily adjust the screen to suit your current needs.

Versatile use and wide compatibility

The Arzopa A3C Pro is compatible with a wide range of devices, making it suitable as an additional screen for a laptop, smartphone, console, desktop or tablet. With USB-C and HDMI connectors, the monitor can be connected to PS4, PS5, Xbox, Nintendo Switch and other mobile devices. With just one connection, you can use the extra screen to boost your productivity or enjoy games on a larger surface.

Adjustable viewing angle and ultra-thin design

The Arzopa A3C Pro monitor is designed with comfort in mind. The built-in stand allows you to adjust the angle of the screen up to 80°, allowing you to set the perfect position for working, watching movies or gaming. In addition, the slim, ultra-thin design makes the monitor lightweight and easy to
