JMGO O2S Ultra Projector

A massive, cinema-quality image projected from just a few inches away from the wall, stunning brightness and realistic colors visible even in daylight, plus a compact design that easily fits on a standard TV stand—that's what the JMGO O2S Ultra projector offers. With it, you get a detailed 4K image generated by an advanced laser system, spatial audio supported by Dolby Atmos, and full access to your favorite streaming platforms via Google TV. Intelligent image adjustment to conditions and surfaces, smooth motion in dynamic scenes, and the ability to create a home theater up to 150 inches make every screening a unique experience, without complicated installation or additional devices.

4K Cinema in Your Home

The JMGO O2S Ultra projector transforms home entertainment. Thanks to its groundbreaking 0.16:1 throw ratio, you can achieve an impressive image of up to 100 inches from a distance of just 16.8 cm from the wall. This is an even shorter throw ratio than the standard 0.2:1, giving you complete

freedom to arrange your space without having to rearrange furniture or mount the projector to the ceiling. The device fits easily on a standard TV stand, offering a massive screen where it was previously impossible.

Bigger picture, smaller body

Despite its compact size, the projector doesn't compromise on performance or reliability. With a design roughly the size of a toaster and weighing about 4.5 kg, it's one of the smallest and lightest ultra-short-throw projectors on the market. It fits seamlessly into any space—from a modern living room to minimalist interiors—without dominating the decor, while still offering a cinematic experience on the big screen.

An image that impresses in any setting

The display quality is ensured by the patented MALC™ RGB Pure Triple Laser 3.0 technology, which delivers an incredibly detailed image in 4K resolution (CTA-certified). The projector generates a brightness of up to 3,600 ISO lumens, resulting in a clear, vibrant image even during the day. Natural colors, high detail depth, and realistic scene reproduction make every projection look impressive—from movies to sports broadcasts.

Sound that fills the entire room

The visual experience goes hand in hand with high-quality sound. Built-in Dynaudio-certified speakers and Dolby Atmos support create a spatial audio scene that surrounds you from all sides. Deep bass and clear dialogue mean you don't need an additional sound system to experience the cinema atmosphere in your own home.

Smart entertainment without extra devices

The JMGO O2S Ultra runs on the latest Google TV system, offering instant access to the most popular streaming platforms, such as Netflix, Disney+, YouTube in 4K, Hulu, and Prime Video. You don't need any extra set-top boxes or cables—you have everything in one device. Additionally, the built-in Google Assistant lets you control the projector with your voice. Just say "Hey Google" to start a movie, adjust the volume, or switch sources.

Perfect image in any conditions

The projector is equipped with advanced automatic correction systems that operate in real time. Automatic keystone and focus correction ensure the image is always perfectly aligned, even on uneven surfaces. Ambient light adaptation guarantees comfortable viewing regardless of conditions, and MEMC technology eliminates motion blur in dynamic scenes.

Wide screen size from 80 to 150 inches

The JMGO O2S Ultra lets you create a true home theater experience ranging from 80 to even 150 inches. For even better results, you can pair it with a dedicated ALR screen that filters out up to 95% of ambient light. The result? Brighter whites, deeper blacks, and a sharper image, even in a bright room.

Even more features

Thanks to the JMGO Ambience app, the projector becomes more than just a device for watching movies. It can transform your living room into an art gallery, creating a unique ambiance tailored to your mood. It's a blend of technology and lifestyle that allows the JMGO O2S Ultra to not only display an image but also create an unforgettable atmosphere. If you're looking for a solution that combines the highest image quality, a compact design, and maximum ease of use, you've just found it!

Included

- Projector
