Petlibro Dockstream cat drinker with wireless pump, 2.5L

Petlibro Dockstream is a cat waterer designed with safety, convenience and ease of use in mind. Thanks to its clever design and a range of safety features, the device takes care of constant access to fresh water, even when you're not at home. The 2.5-liter capacity lasts for about 10 days (for 1 cat), and the wireless pump makes cleaning and installation easy. The device offers two modes of operation: Fountain and Gushing, adjusting the action of the drinker to the cat's preference.

Wireless pump - easy to use and clean

One of the main advantages of the device is the wireless water pump, which can be easily removed from the tank without disconnecting the wires. This makes cleaning much easier and prevents

accidental damage. The construction of the pump is designed to be fully safe and easy to remove.

4-layer filtration

The drinker is equipped with a four-layer filtration system, which cleans the water of dander, odors, heavy metals and other contaminants. The filter includes non-woven fabric, activated carbon, ion-exchange resin and high-density sponge.

Safety features that protect the cat and the device

The drinker has a sensor for lack of water - if the level falls below the minimum, the pump automatically shuts off, protecting against overheating. In addition, the FOD (Foreign Object Detection) function immediately stops the power supply if a metal object, such as a key, is found near the base. This makes it safer to use in everyday home environments.

Quiet operation and design for easy cleaning

The drinker operates very quietly - it generates a noise level of just 23 dB, which means it won't disturb sleep or stress your cat. The rounded edges of the tank prevent dirt from accumulating in the corners, making it easy to clean. A snap-on safety lid protects against accidental water spills.

Robust design

The drinker is made of BPA-free plastic, making it safe for pets' health. It also comes with a bite-resistant braided USB-C cable to prevent your cat from damaging it.

Ready for emergencies

Even in the event of a power outage, the water bowl retains a 130 ml supply of water, enough for your cat to drink before you refill it or plug in the power. This is a practical precaution in case of sudden emergencies.

Manufacturer	Petlibro
Model	PL-WF005-31W
Input voltage	100-240V, 50/60 Hz
Output voltage	5V/1A
Material	ABS, stainless steel
Capacity	2,5 l
Dimensions	232 x 177 x 161 mm
