GODOX SFUV8080 80 cm Softbox Kit

This kit, featuring an S-type mounting bracket and a foldable 80 × 80 cm softbox, stands out for its compact design, which requires no complicated assembly. As a result, setting up the lighting takes very little time, allowing you to start a photo shoot or video recording efficiently. The well-thought-out design makes the entire kit convenient to use both in the studio and on location.

Soft and Even Light

The included 80 × 80 cm foldable softbox produces soft and evenly diffused light. Internal and external diffusers help effectively soften the lighting, providing a more natural effect and better control over the light. The set is complemented by a carrying bag that makes it easy to store and conveniently transport the kit.

Convenient Adjustment

The handle allows for free adjustment of the light direction, making it easy to adapt the setup to your current needs. The design allows you to rotate the mount and tilt it 90° forward and backward, increasing flexibility during use. Additionally, there is a hole at the bottom for mounting an optional umbrella or other compatible accessories.

Universal compatibility with Bowens accessories

The mount allows you to attach flash units from most brands in both horizontal and vertical orientations. On the front is a Bowens-compatible Speed Light ring, which allows you to use a wide range of Bowens-mount accessories, such as barn doors or diffusers. This allows you to easily shape and precisely control the light, adapting it to the nature of your photos or videos.
