VEXILAR V10 Pro Cordless Upright Vacuum Cleaner

The VEXILAR V10 Pro Cordless Upright Vacuum Cleaner is a modern appliance that combines high suction power of up to 45,000 Pa, a cordless design, a runtime of up to 45 minutes, a lightweight body weighing approximately 2.2 kg, and a practical set of accessories for cleaning various surfaces. The adjustable telescopic tube, removable battery, LED display, green brush backlight, and five-stage CycloneFlow filtration system™ make this vacuum cleaner ideal for both everyday floor cleaning and cleaning hard-to-reach areas. It's a solution that lets you conveniently keep your home tidy without the limitations of a power cord.

Suction power up to 45,000 Pa

The motor, which generates suction power of up to 45,000 Pa, effectively removes dust, crumbs, sand, pet hair, and other everyday debris from hard floors and carpets. The vacuum cleaner handles both fine and larger debris, making cleaning faster and requiring fewer passes. Its high performance allows you to keep both small apartments and larger homes clean.

Up to 45 minutes of cordless runtime

The battery provides up to 45 minutes of runtime in Eco mode, allowing you to clean an area of up to approximately 120 m² on a single charge. The cordless design gives you greater freedom to move between rooms and makes it easier to clean stairs and your car. The removable battery can be charged either inside the device or separately, and if needed, you can use an additional battery available separately.

Advanced CycloneFlow™ Filtration

The five-stage CycloneFlow™ filtration system uses multi-stage particle separation and a HEPA filter to effectively separate dust from the airflow. The system captures up to 99.9% of fine particles and allergens as small as 0.1 µm, helping to prevent them from being released back into the environment. This design ensures high vacuuming performance and cleaner air expelled from the unit.

Lightweight design and adjustable telescoping tube

The device weighs approximately 2.2 kg, so moving it between rooms requires little effort. The adjustable telescoping wand, which extends from approximately 50 to 70 cm, allows you to adjust the vacuum cleaner's length to suit your height and the type of task at hand. This makes it more convenient to vacuum both floors and higher surfaces, such as curtains, shelves, or corners near the ceiling.

Agile Electric Brush with Green LED Backlight

The electric brush rotates 180° sideways and 90° vertically, making it easy to navigate around obstacles and clean under furniture without having to move it. The green LED light with a wide 120° beam angle effectively highlights fine dust, hair, and pet hair that often remain invisible under

standard lighting. This allows you to clean even dimly lit areas more thoroughly.

Intuitive LED Display

The easy-to-read LED screen lets you monitor the device’s key operating parameters in real time. The display shows the battery charge level, the selected operating mode, and the vacuum cleaner’s current settings. All information is available in one place, which simplifies operation and enhances the convenience of everyday use.

Easy Emptying and Convenient Storage

The dust container can be emptied with the push of a button, making debris removal quick and convenient. The dustbin, HEPA filter, and filtration system components can be easily removed and cleaned, making it simple to keep the vacuum cleaner in good condition. The included wall mount allows you to store the vacuum cleaner and its accessories neatly, saving space.

Included in the set

- VEXILAR V10 Pro vacuum cleaner
- Electric floor brush
- Telescopic tube
- Rechargeable battery
- HEPA filter
- Crevice tool
- 2-in-1 brush
- Wall mount
- Charger
