VEXILAR V15max Cordless Upright Vacuum Cleaner

The VEXILAR V15max upright vacuum cleaner is a cordless device designed for convenient and effective cleaning throughout your home. It offers 65,000 Pa of suction power, up to 60 minutes of runtime, a 1.5-liter dust bin, a multifunctional 4D TurboBrush electric brush, a six-stage filtration system with a HEPA filter, a color LED display, and a flexible hose that makes it easy to vacuum under furniture. A wide range of attachments makes the device ideal for cleaning floors, carpets, upholstery, crevices, and car interiors, while its compatibility with a mopping module further enhances its functionality.

65,000 Pa of suction power effectively removes dirt

The motor, which generates 65,000 Pa of suction power, effectively removes dust, sand, pet hair, and other everyday dirt from various surfaces. Its high performance allows for thorough vacuuming of both hard floors and carpets or rugs without the need to go over the same spot repeatedly. This makes cleaning faster, and the results are visible after the very first use.

The 4D TurboBrush thoroughly cleans various surfaces

The 4D TurboBrush combines rubber strips, soft and hard bristles, and a design that prevents hair from getting tangled. This design facilitates the effective collection of dust, pet hair, and fine debris from both hardwood floors and tile, as well as from carpets. Additionally, the 15-mm-high intake allows for easy suction of larger debris, such as crumbs, seeds, or small objects, reducing the risk of the brush becoming clogged.

Green LED lighting makes it easier to spot dust

The front of the brush is equipped with green LED lighting with a 120° beam angle. Thanks to this, fine dust, hair, and pet hair are more visible even under furniture and in dimly lit areas. This allows you to vacuum surfaces more thoroughly where debris often goes unnoticed.

The flexible hose enhances cleaning comfort

The flexible hose allows you to comfortably vacuum under beds, cabinets, and couches without having to bend over. This makes it easier to reach hard-to-reach spots where dust and other debris accumulate. This feature enhances user comfort and allows you to clean the entire room more quickly.

Attachments for various uses

The set includes a crevice tool that makes it easy to clean spaces between furniture, along baseboards, and inside a car. The 2-in-1 brush is ideal for vacuuming upholstered furniture, curtains, and other delicate surfaces. The vacuum cleaner is also compatible with an optional mattress brush, designed to thoroughly remove dust, hair, and other debris.

Up to 60 minutes of runtime on a single charge

The high-capacity battery allows you to use the vacuum cleaner for up to 60 minutes in standard mode. In carpet mode, the device runs for up to 35 minutes, while in Turbo mode it runs for up to 25 minutes, providing maximum power when removing tougher dirt. Several operating modes allow you to adjust performance to the type of surface being cleaned.

Color LED display provides full control

The easy-to-read LED screen displays key information about the device's operation. You can check the battery charge level, the currently selected operating mode, and messages indicating a possible blockage of the brush or airflow at any time. This makes operating the vacuum cleaner intuitive and convenient.

Six-stage HEPA filtration ensures cleaner air

The vacuum cleaner uses a six-stage filtration system equipped with HEPA filter cartridges that capture up to 99.9% of particles as small as 0.3 µm. The multi-layered design effectively separates dust and fine particles from the airflow. As a result, fewer contaminants are released into the room while vacuuming, which enhances the comfort of daily use.

Spacious Dust Bin and Convenient Emptying

The 1.5-liter dust bin allows you to clean for longer without having to empty it frequently. The one-button opening mechanism allows for quick removal of collected debris without direct contact with dust. An additional advantage is the ability to rinse the container under running water, which makes it easier to keep the unit clean.

Easy storage and convenient charging

The VEXILAR V15max model can stand upright on its own, so you can conveniently set it aside while cleaning. The set also includes a wall mount with a charging function, which allows you to store the device and recharge the battery at the same time. This solution helps save space and ensures the vacuum cleaner is always ready for use.

Included in the set
