VEXILAR X7 Electric Mop

The VEXILAR X7 Electric Mop is a modern device that combines vacuuming and mopping functions, allowing you to remove dry debris and spilled liquids in a single pass. It features the PureFlow Cleaning System, a motor reaching 104,000 rpmmin, 20,000 Pa of suction power, and a roller brush rotating at 500 rpm, allowing it to effectively handle everyday dirt on various types of floors. The device operates for up to 40 minutes on a single charge, allows you to clean an area of up to 250 m², features separate tanks for clean and dirty water, has a self-propelled drive, and a slim design that enables cleaning right up to edges and under furniture.

Vacuuming and mopping in one step

The VEXILAR X7 simultaneously vacuums up debris and washes the floor, so you don't have to vacuum first and then reach for a traditional mop. The device effectively picks up dust, crumbs, hair, pet hair, and spilled liquids, leaving the floor clean in a single pass. This solution saves time and makes it easier to keep things tidy during both daily cleaning and major cleanups.

PureFlow Cleaning System - a clean brush throughout operation

The PureFlow Cleaning System continuously sprays the brush with fresh water, ensuring that the roller is rinsed as you clean. Used water, along with dirt, is collected in a separate tank, so contaminants are not redistributed across the floor. This ensures high cleaning effectiveness from start to finish.

Powerful Motor and Suction Power

The VEXILAR X7 is equipped with a motor operating at 104,000 rpm, which generates 20,000 Pa of suction power. As a result, the device effectively removes both fine dust and larger debris, as well as spilled liquids from hard surfaces. Its high performance makes the mop well-suited for daily cleaning of the kitchen, living room, or entryway.

Brush rotating at 500 rpm

The mop roller rotates at 500 rpm, ensuring even cleaning of the floor across its entire working width. The constant rotation speed helps effectively remove dirt and refresh the surface without having to go over the same spot repeatedly. This makes cleaning faster and requires less effort.

Anti-Tangle System and Effective Dirty Water Suction

The Anti-Tangle System automatically removes hair and other debris that gets tangled around the roller brush. At the same time, the device sucks up dirty water into a dedicated tank, which helps leave the floor with minimal moisture. This solution reduces the need for manual brush cleaning and enhances the comfort of daily use.

Included in the set

- VEXILAR X7 electric mop
- Handle
- Docking station
- Power adapter
- Roller brush
