Oneisall F1-M 3L WiFi smart pet food dispenser

Oneisall F1-M is an automatic food dispenser that is designed for the daily convenience of both the pet and its caregiver. With its large capacity and app-controlled function, the device ensures regular meals even when you're away from home.

Voice message recording

The dispenser allows you to record a voice message that will be played every time a portion of food is given. This allows you to summon your cat with a familiar voice, which increases his sense of security and speeds up his response to feeding time. This is especially useful if you want to keep in touch with your pet even when you're not home.

Up to 100 days of operation

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The Oneisall F1-M is equipped with a powerful battery that provides up to 100 days of operation on a single charge (with 6 servings per day). This significantly reduces the frequency of plugging in the device and makes it suitable for extended trips as well. In addition, you can check the battery level in real time both on the dispenser's display and on the mobile app.

Large capacity

The tank is distinguished by its 3L capacity, which allows for uninterrupted operation for up to 12 days. Thanks to this, you don't need to refill the food every day - you only need to refill once every dozen days or so. This is a good solution especially for those who are often away from home or planning a short trip without the cat.

Control through the app

With the dedicated app, you will set the times and number of feeding portions, no matter where you are. You can change the schedule on the fly, and each change is immediately visible on the device. The app also displays the battery charge level and the number of remaining days of operation.

Automatic notifications

The dispenser monitors the feed level and automatically notifies you when there is little feed in the tank. Low level information appears both in the app and on the device's screen.

Suitable for most feeds - up to 18 mm

The Oneisall F1-M is suitable for dry food and snacks up to 18 mm in diameter, making it a universal solution for most cat products on the market. Whether your pet prefers small or slightly larger crunches - the device will handle them without any problems.
