VITURE Pro 2 XR Headset

An evening movie on a plane, a few dozen minutes spent in the world of your favorite game, or perhaps working on a huge virtual screen without taking up space on your desk? The VITURE Pro 2 XR Headset was created precisely so that digital entertainment and daily tasks can accompany you everywhere. Sony Micro-OLED displays with a resolution of 1920 × 1080 pixels per eye, UltraClarity 3.0 technology, a 120 Hz refresh rate, brightness of up to 1,600 nits, and a virtual screen with a diagonal of 146 inches—all of which blur the line between the screen and the surrounding space—all packed into a lightweight design weighing just 63 g.

UltraClarity 3.0 - Clear Image from Edge to Edge

UltraClarity 3.0 technology utilizes an advanced Birdbath optical design and Sony Micro-OLED displays, delivering a clear, high-contrast image no matter where you look. With 108% sRGB color coverage and a contrast ratio of at least 100,000:1, landscapes, game worlds, and movie scenes dazzle with their depth of color and richness of detail.

Designed for long sessions in the XR world

With a slim design, a variety of nose pad sizes, and SGS Eye Strain A+ certification, the VITURE Pro 2 XR glasses ensure comfort even after hours of use. Thanks to their ergonomic design and a light transmittance of just 5 percent, you'll forget you're even wearing them. Nine brightness adjustment levels let you quickly tailor the image to your preferences.

An Image Tailored to Your Vision

Every user perceives the world slightly differently, which is why the VITURE Pro 2 offers dual diopter adjustment ranging from 0 to -5.0 D. You'll enjoy a clear image right out of the box—no additional accessories are needed. An adjustable interpupillary distance ranging from 57 to 71 mm and binocular fusion technology further enhance the naturalness of the viewing experience.

Sound that surrounds you from every direction

The full XR experience consists not only of visuals but also of sound. The built-in AAC system and spatial audio make dialog, sound effects, and music sound clearer and more immersive. Nine-level volume control lets you quickly adjust the sound level to your surroundings, and the glasses-wearing detection feature automatically recognizes when you start using the device.

Play, watch, and work wherever you want

With VITURE Pro 2, your living room can turn into a private movie theater, the passenger seat into an entertainment hub, and your desk into a large-format workspace. The glasses support 2D and 3D content and are compatible with SpaceWalker technology. You can play games on Nintendo Switch and Switch 2 consoles, laptops, PlayStation and Xbox devices, and cloud gaming platforms. The 146-inch virtual screen lets you comfortably watch movies in any position and create an expansive work environment no matter where you are.

An ecosystem that grows with you

The VITURE Pro 2 is compatible with additional brand accessories, such as the VITURE Pro Neckband, VITURE One Neckband, Mobile Dock Mini, Pro Mobile Dock, and the VITURE x 8BitDo Ultimate Mobile
